Order Sheet for Plants and Bulbs

We always recommend having plants sent by express, at purchaser's expense, when there is an express office near, as we can usually send somewhat larger plants, and do not have to wash the soil off the roots (as in the case when sent by mail). We always try to add enough extra plants of our own selection to help pay the charges. Kindly write your list of plants all together on this page (not mixed up with the seeds) so as to prevent any mistake upon the part of our clerks in copying the order. We do not ship plants to Canada, Mexico and Foreign Countries. Be sure to read paragraph marked "Plant Shipments" on Page 1 of Catalog.

Crimson King (Old Fashioned Hardy Carnation).

Hardy Carnation Crimson King, 35c

Blooms All Summer

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. The color is a rich crimson; the fragrance is delicious. This is the variety so much sought after, owing to its hardiness and everblooming quality. Foliage dark green with stout stems, producing the rich crimson bloom in great profusion. Individual bloom, good size and delightfully clove scented. It is becoming more popular every year as a garden plant. **Price for plants to bloom this summer, 35c each; 3 for \$1.00; 12 for \$3.36, postpaid.**

A VALUABLE NEW BOOK HOW TO GROW of Practical Information SEEDS and FLOWERS

READ THESE FEW WORDS ABOUT RELIABLE SEEDS

From good seeds only can good crops be grown

Yet a great many contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons we cannot, of course, guarantee or be responsible for a crop, as success is dependent upon natural causes, which are beyond human control. Therefore, we do not warrant in any way, express or implied, the contents, or the description, quality, productiveness, or any other matter of any seeds, bulbs, or plants sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once, and money will be refunded. Subject to above conditions we make this sale, at the moderate prices at which we sell our goods.

FAIR PLAY GUARANTEE

First—We guarantee that all seeds sold shall reach customers in good condition.

Second—We guarantee to hold ourselves responsible for the safe arrival of all remittances sent us by P. O. Order, Bank Draft, Express Order, or Registered Letter.

Third—We guarantee to deliver free of charge in the United States all garden and flower seeds listed in this catalogue, except those quoted at wholesale prices on pages 2 and 3, and Field Seeds, Grass Seeds, Potatoes and such other items that are plainly marked to be shipped by Express or Freight at purchaser's expense.

Fourth—We guarantee Buckbee's "Full of Life" Seeds to be just as represented—if they prove otherwise, **notify us immediately** upon receipt of seeds, sending us the shipping tag which was on the shipment and we will refill the order free of charge, or refund the money paid us for same.

Buckbee's World's Fair Lawn Grass.

Buckbee's Famous "Full of Life" Lawn Grass Seed

Produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer. A lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with appearance and the permanency of the lawn.

Buckbee's World's Fair Lawn Grass Seed

THE VERY BEST LAWN SEED EVER OFFERED
HAVE A GOOD LAWN THIS YEAR. NOTHING IMPROVES
A HOME AS MUCH AS A WELL KEPT YARD

This famous Prize-Winning Lawn Grass is made up of a most evenly balanced combination of native and foreign fine-leaved, deep-rooting grasses that interweave and flourish in different soils and climates, each showing its best strength at seasons different from the others, and thus keeping the lawn vigorous and green from winter's end to winter's next advent. It is unrivaled for purity and luxuriance in growth and will give complete satisfaction wherever sown. With ordinary care, anyone can, by using this mixture, secure a beautiful lawn. Complete and explicit directions on "How to Make a Lawn" accompany every package of this seed. The quantity table on this page shows the amount of seed to plant in a given area.

Buckbee's Shady Place Lawn Grass Seed

THE VERY BEST OBTAINABLE—CAREFULLY BLENDED—
YOU CAN HAVE A BEAUTIFUL LAWN WITH VERY
LITTLE WORK, BY USING OUR WELL
BALANCED MIXTURE

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Price, postpaid, 1/2 lb. 35c; 1 lb. 60c; 3 lbs. \$1.45. By express or freight, not prepaid, 5 lbs. \$2.75; 10 lbs. \$5.40; 15 lbs. \$7.95; 25 lbs. \$13.00.

SNAP TOOTH RAKES

Cuts Lawn and Garden Labor In Half. Rake Like You Sweep.

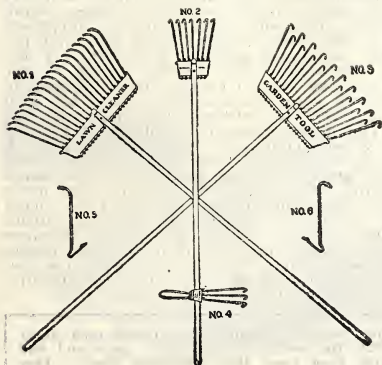

Teeth are made of oil tempered spring steel having reverse curve with groove to hold them in channel. (See Figs. 5 and 6.) No bolts, no nuts, no screws—you merely remove or change the teeth to conform to the work.

No. 1—Is made to save the lawn. The spring teeth follow the natural contour of the lawn. It is used with the same sweeping motion as a broom or as a rake—cleans self easily by reversing and wiping tines on ground. Fine for clearing off flower beds in spring. Due to its flexible teeth, it will not injure the most delicate plant.

By express \$1.00, or postpaid \$1.19.
No. 2—Very light, especially suitable for ladies. This tool is specially adapted for working over tulip beds, as it will not cut off the top of the tulip bulb. It is fine for cultivating around shrubbery and flowers. It is easily changed to long and short teeth by slipping each alternate tooth down into the channel. Teeth may be removed in one second to make a narrower cultivator.

By express 85c, or postpaid \$1.00.
No. 3—The handy tool of the landscape man. No. 3 has no equal for landscape men who are building lawns; for gardeners, or in fact for anyone who wants a light, flexible, easy-working rake. It thoroughly pulverizes the soil but does not pull the dirt—due to the short and long tooth construction. It may be made to fit the width of any row up to 19 inches and by the removal of teeth it may be made to straddle one or two rows. By express \$1.25, or postpaid \$1.48.

No. 4—This is the lightest and strongest tool made for close up hand work in flower beds and garden, as it will not pull the dirt like most garden cultivators. Can be made into four different tools. Postpaid 45c.

Snap Tooth Rakes.

BRUSSELS SPROUTS

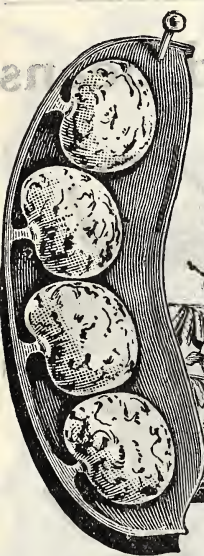

BUCKBEE'S MATCHLESS

The finest strain of sprouts. The plants are of strong, vigorous growth, closely jointed and are covered the entire height with very large, solid, tightly folded sprouts of exquisite quality. Buckbee's Matchless is an early variety; frost will find the sprouts fully developed and the stems thickly set. Brussels Sprouts are very largely grown in the South, as high as 250,000 barrels being shipped in a single season from Norfolk, Va. They are well worthy of extensive culture anywhere in this country. The plants resemble Cabbage in growth, but make small, compact, round heads at each leaf joint on the stalk. These heads are cut off when well formed and marketed in Strawberry Boxes holding one quart. The plants are quite hardy, are not injured but improved by hard frosts, and are left in the garden or field during winter until wanted. These miniature Cabbages may be boiled like cabbages or cooked in cream like Cauliflower. They are the most delicious and delicately flavored variety of the Cabbage family. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 90c.

Mrs. Ester Mayfield, Trinity, Ala.—I have used Buckbee's "FULL OF LIFE" Seeds for 10 years and had better results from them than from any others. They never fail to grow.

New Jackson Wonder Bush Lima

THE BEST BUSH LIMA BEANS

Buckbee's "Full of Life"
Seeds Are Bred for Disease
Resistant Qualities

BUCKBEE'S IMPROVED BUSH LIMA

Superior Quality, Exquisite Flavor, Fine Color,
Good Shipper, Hardy Grower, Enormously
Productive, Matures Early, Excellent
Keeper.

This is the very "newest" in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. Is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the Beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, flavor unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell bean for winter use.

It has become very popular and our sales of it are enormous, far exceeding those of any other Bush Lima variety. Send to BUCKBEE for originator's stock seed. Postpaid, pkt. 10c; ½ lb. 35c; lb. 55c.

NEW JACKSON WONDER BUSH LIMA

Medium Size, Beautifully Colored Speckled Beans.

This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. Postpaid, pkt. 10c; ½ lb. 22c; lb. 40c.

BURPEE'S IMPROVED BUSH LIMA

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden.

This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee's Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and often measure 24 inches across the top. They are very productive, producing immense crops of showy pods which are from 5 to 6 inches in length. The Beans are of enormous size and of most luscious flavor. Postpaid, pkt. 10c; ½ lb. 30c; lb. 50c.

FORDHOOK BUSH LIMA

Exceptionally Fine Quality. The Leading Bush Lima in the East.

An improved Dreer's Bush Lima. The plant is vigorous and erect growing, bearing the pods well above the ground. The pods, which are produced in large clusters, are medium green, about 4¾ inches long, and each contains three to five large Beans of exceptionally fine quality. Both pods and Beans are twice the size of Dreer's Bush Lima; in season it is two weeks earlier. Seed large, irregularly oval in shape, very thick, white with greenish tinge. We consider this a decided acquisition to the Dwarf Limas and one of the very best. Postpaid, pkt. 10c; ½ lb. 35c; lb. 55c.

BURPEE'S BUSH LIMA

Erect, stout bushes, 18 inches high, and with a diameter of 2 to 3 feet. Very productive. Large pods filled with large beans of luscious quality. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

HENDERSON'S BUSH LIMA

Compact bushes one foot high. Valuable on account of its earliness and productiveness. Pods are medium dark green, about 2¾ inches long and contain from 2 to 4 Beans, which are of excellent flavor, either green, shelled or dry. Quality is always delicious. Pkt. 8c; ½ lb. 23c; lb. 42.

Buckbee's Improved Extra Early Valentine.

BUCKBEE'S IMPROVED EXTRA EARLY VALENTINE

Standard Round Pod Snap Bean.

Buckbee's Improved Valentine is the earliest, hardiest and finest strain of this popular variety in the country; it is a heavy cropper; true round podded; the pods are very uniform in size and of excellent quality. This strain produces edible pods in less than five weeks from sowing. For snaps there is nothing superior to this variety among the green podded sorts. Vines erect, with coarse dark green leaves and large white blossoms. Pods medium length, curved, cylindrical, with crease in back; very fleshy, crisp and tender. Beans medium size, long, irregular, pink marbled with red. Largely grown by market gardeners for an early crop. Postpaid, pkt. 10c; ½ lb. 22c; lb. 40c.

BUCKBEE'S EXTRA EARLY BOUNTIFUL

Stringless, Tender, Continuous Bearer.

One of the very earliest and largest podded green bush Beans. Pods handsome, long and straight, of very fine quality. The plants are quite large, grow erect, commence to bear very early and continue for a long time. They are very productive. The pods are from 7 to 7½ inches long, are flat, of light green color, solid, meaty, brittle, tender, stringless at all stages of growth, and of delicious flavor. The illustration on this page is taken from a photograph of a single matured plant and shows its immense prolificness. They are fine for use as snap sorts, being entirely stringless, meaty and of the finest flavor and quality. When allowed to mature the shelled beans are of pure white color, good sized and most excellent for Winter use.

The vines begin to bear pods quite early and continue to produce enormous quantities until frost.

MANGEL WURTZELS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities
Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets.

Plant five pounds of Seed per acre.

BUCKBEE'S MASTODON

The Heaviest Cropping and Largest of All Mangels.

It is truly a Mammoth, a single root often weighing 75 pounds and over; in yield it is enormously productive—1,500 to 1,800 bushels per acre is nothing uncommon on good soil. It grows well above ground and on account of its shape is easily harvested. In length is about the same as Buckbee's Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. In fact it combines all the fine points possible to condense in a Mangel of the highest nutritive value, and is without question the best and most profitable Mangel for dairy farmers. This is our pedigree stock—especially selected, and can be relied upon as the best money can buy and our moderate prices place it within the reach of all. Oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 80c, postpaid.

BUCKBEE'S MAMMOTH LONG RED

A Wonderful Yielder.

A standard and favorite Mangel, producing a very large root uniformly straight and well formed, weighing from 30 to 40 pounds each, of a beautiful dark red color, wonderfully productive, average 1,000 to 1,500 bushels per acre. Keeping qualities not excelled. Our stock is a great improvement over the old variety. Oz. 8c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 70c, postpaid.

GOLDEN TANKARD

The Great Milk Producer.

This distinct variety is a most important addition to our list of roots for stock feeding, as it contains less water and more sugar than most Mangels. Sheep and all other stock thrive wonderfully on it; its great milk-producing qualities and richly colored yellow flesh have made it a favorite with every dairy farmer.

It is an immense yielder and 60 to 75 tons per acre have often been grown on good ground and under good cultivation. The roots are handsome, of an ideal, cylindrical form, with small neck, clean, generally with only one tap-root, and can easily be lifted, and are excellent keepers. The skin is light gray above and deep orange below the ground, the flesh is bright golden yellow, differing from all other varieties, which cut white. Oz. 8c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c, postpaid.

BUCKBEE'S GOLDEN MONARCH

This entirely new and distinct Mangel grows to the largest size and is of a beautiful russet yellow color. The flesh is white, firm and sweet, greatly relished by cattle and other stock. The roots are large, ovoid shaped with small tops admitting close planting. Easily lifted, growing more than half above ground, producing enormous crops, and is an excellent keeper. Oz. 8c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 70c, postpaid.

CHAMPION YELLOW GLOBE

One of the best for stock feeding. The roots grow almost entirely above ground and are therefore best adapted for shallow soils and are easily harvested. It produces as much per acre as most of the longer growing Mangels. It is a good keeper. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c, postpaid.

CHAMPION RED GLOBE

Similar to above except in color, which is a light red or pink. Oz. 7c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 30c; 1 lb. 55c, postpaid.

MIXED MANGEL SEED

Choicest sorts mixed. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c, postpaid.

SUGAR BEETS FOR STOCK FEEDING

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S GIANT FEEDING SUGAR

The Greatest Beet for Feeding Stock

This magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield, under equally favorable conditions, more than double that of sugar beets and, not being so sweet, are less liable to injure the kidneys when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1b. 65c, postpaid.

BUCKBEE'S NEW IMPERIAL SUGAR

This Beet is the result of years of methodical and persevering selection. It gives better results than any other variety. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most satisfactory results. Postpaid, oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1b. 75c.

KLEIN WANZLEBEN SUGAR BEET

This variety at the present time has probably a wider cultivation than any other Sugar Beet. While not, as a rule, equal to BUCKBEE'S NEW IMPERIAL SUGAR in saccharine richness, it is considerably more productive. We offer seed the second year from polarized roots. Postpaid, oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1b. 60c.

THE BEST STOCK CARROTS

Every farmer should plant a few acres of Carrots for stock food; they are very productive, less liable to disease than many other root crops, and being sown earlier do not interfere so much with the labor in the busy time. They can be stored over Winter like Potatoes. Make excellent nutritive feed for all stock. Horses are very fond of them and they increase the flow of milk in cows, improve the quality of butter and give it a beautiful golden color.

BUCKBEE'S CHAMPION

The World-Beating Stock Carrot.

Buckbee's Champion is not, properly speaking, a table Carrot, although the flesh is remarkably firm and sweet. But it is most emphatically a Stock Carrot for the farmer and stock raiser, and once used nothing will take its place. It is the heaviest cropping variety grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid

and very sweet in flavor. The roots are of medium size, very broad and heavy at the shoulder and are therefore easily harvested. They frequently measure 15 to 20 inches in circumference and 25 to 50 tons per acre is not an extravagant statement as to yield. Our own growth, choicest Northern home-grown pedigreed stock seed. Oz. 12c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 50c; 1b. 90c.

BUCKBEE'S IMPROVED SHORT WHITE

Roots 7 to 9 inches long, smooth, very heavy at the shoulder, having a diameter of 3 to 4 inches, but taper regularly to a point growing almost entirely in the ground. Flesh rich, white, solid, crisp and of excellent flavor. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1b. 60c.

BUCKBEE'S IMPROVED LONG ORANGE

The roots of the improved strain of this variety we offer are very deep orange, long and comparatively thick, often 12 inches in length and 3 inches in diameter. This intermediate to late maturing sort is suitable for table use as well as stock feeding, combining great productiveness with uniform shape where grown in light, deep, rich soil. When of size suitable for the table, the roots are tender and of good quality. Oz. 12c; 2 oz. 18c; ¼ lb. 28c; ½ lb. 45c; 1b. 80c.

MAMMOTH WHITE BELGIAN

Splendid variety for table and stock. The roots are mammoth in size and very productive, often yields ten tons roots per acre. Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1b. 65c.

MAMMOTH YELLOW BELGIAN

Identical to the White Belgian, except in color. Oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1b. 70c.

BUCKBEE'S "Full of Life" CARROTS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities.

The best soil for the Carrot is a sandy loam made rich by manuring the previous year; any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 2 to 6 inches apart in the row, according to the size of the variety.

BUCKBEE'S SELECT DANVERS

The Best Carrot for Every Purpose.

In this selected strain of Danvers Carrot, we not only have a splendid appearing Carrot, which always sells readily, but a variety which is an extra heavy yielder in any soil. We have spared no labor nor expense in perfecting this variety, and confidently claim and believe that it is now the leading Carrot. Adapted to all soils and enormously productive, yielding more than any other table Carrot, and often more than the large field Carrots, and is much easier harvested than these. The flesh is very tender and sweet; it is a valuable Carrot for both table use and for stock. We have an extra fine strain of this favorite sort, which is of very fine bright color, and exceptionally uniform in shape, size and color. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.35.

BUCKBEE'S EARLIEST GARDEN

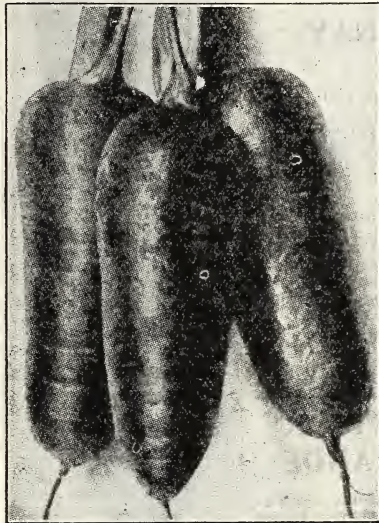

The Earliest Variety in Cultivation and Best for the Table.

Tops small. The reddish orange colored roots are nearly round with a groove about the crown and when fully matured they are about 2 inches in diameter but they should be used before they are full grown when they are tender and delicious. Pkt. 8c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.15.

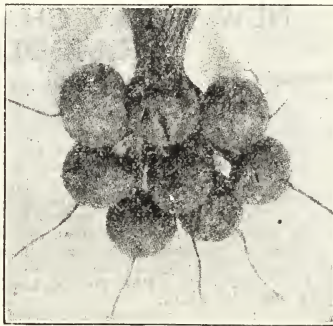

BUCKBEE'S CHAMPION HORN

Extra Early—Good Size—Splendid Keeper.

A splendid new Carrot from Holland where it is very largely grown for the market and considered the finest of all table Carrots. It is an extremely early variety and will be ready for the market in about 45 days from sowing and is about 6 to 7 inches long. It is the sweetest of all Carrots and without any yellow core. The roots are cylindrical, blunt at the end and having a fine neck and small top can be planted close together. The color is very attractive bright red. They are entirely free from any stringy, coarse heart which is found in most other Carrots; are of fine texture and most delicious quality. Pkt. 10c; oz. 15c; 2 oz. 21c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.35.

BUCKBEE'S NEW EARLY CORELESS

Rich Solid Flesh of Finest Quality—The Roots Are Very Uniform in Shape, Size and Color. The roots grow about 8 inches long, taper uniformly to a blunt point. The flesh is deep-orange red, tender and of good quality. It is a first class Carrot for all kinds of soil, valuable for both table use and stock. Grown extensively by market gardeners for bunching and makes a handsome appearance on the market. We have an extra fine strain of this favorite sort which gives the greatest satisfaction to our customers. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Early, Long, Rich Golden Yellow, Splendid Quality, Fine Yields.

A large, handsome, main crop variety. The roots are of large size and very smooth, fine grained and of superior quality. They often grow 10 to 12 inches in length, very broad at the neck, tapering evenly to the small tap root. This beautiful carrot is well formed, grows smoothly and uniformly and is of rich golden orange color. The flesh is tender, sweet and entirely free from woody coarseness. The tops are rather large. Rather late maturing and is equally desirable for table use and for stock feeding. When of a size for the table, the roots are very tender and of good quality. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

HALF LONG DANVERS

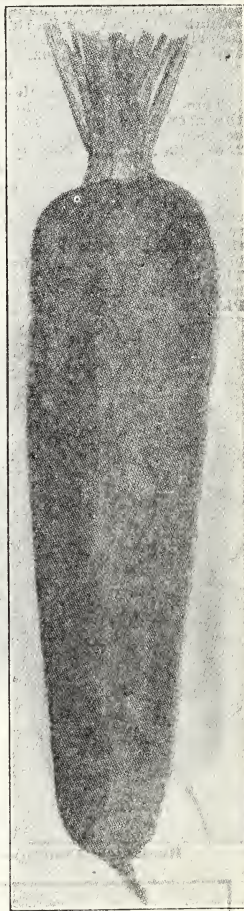

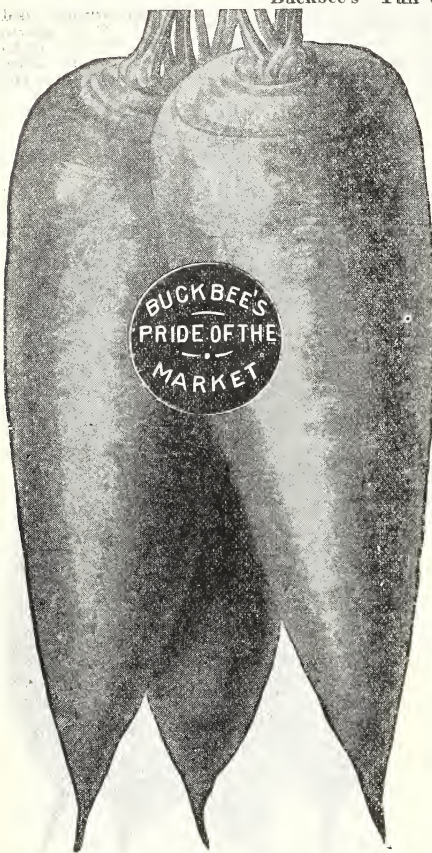

A Splendid Half Long Carrot, Tender, Sweet and Very Productive.

This variety is well adapted to all soils and sections, and some years it leads our whole list as the best seller. It is half long in shape, almost cylindrical, somewhat stump rooted, and of rich, dark orange color. We claim that it will yield greater bulk and weight for a given length of root than any other Carrot now grown. Over 40 tons per acre of fine Danvers have been grown, and a yield of 25 to 30 tons per acre is not uncommon. Matures its crop of beautiful shaped roots in 70 days. Grown extensively by market gardeners for bunching and makes a handsome appearance on the market stalls; of the finest quality and one of the most popular sorts for home use. NEW EARLY CHANTENAY OR MODEL

Buckbee's Private Stock. Crisp and Tender, Half Long, Golden Yellow Flesh.

A most excellent, medium early, half long variety. It is one of the best in quality for the market and home garden, while its great productiveness and the ease with which it can be harvested makes it desirable as a field sort. The tops are medium sized with small neck. The mature roots are thick, 5½ to 6 inches in length, uniformly half long or stump rooted but tapering slightly, smooth, deep orange-red in color. The flesh is very crisp and tender. Although a medium early sort, the roots are suitable for use nearly as early as any. The variety is extensively used for bunching. Buckbee's Chinese or Celery Cabbage.

BUCKBEE'S CHINESE OR CELERY CABBAGE

A New, Most Delicious Vegetable Which Should Be in Every Garden and Which Is One of the Most Profitable Crops to Grow for the Market, As Tender as Lettuce; Flavor as Delicate as Celery.

The Chinese or Celery Cabbage belongs to the Cabbage family; when young, it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, often weigh 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and has as distinctive a flavor, being very delicate and pleasant; every leaf, including the outside ones, is tender and edible. It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French dressing, it makes a splendid cold slaw. It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower. Our seed is Chinese grown, which is the only reliable stock for good solid heads. Prices, postpaid, pkt. 10c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; lb. \$3.50.

Buckbee's New Race Horse Cabbage—Named in Honor of Red Lancelot, the Famous 2-Minute Pacer, Owned by Buckbee's Rockford Seed Farms

BUCKBEE'S NEW RACE HORSE

Absolutely the Earliest Cabbage in Cultivation—Indispensable to the Market Gardener for His Very Earliest Crop. Buckbee's Race Horse is ready for use in sixty days from sowing—ten days earlier than Jersey Wakefield. The plants are very hardy and can be set out very early; they are always sure to head, making good sized, solid and firm pointed heads, which, though a little smaller than Jersey Wakefield, are always marketable, and being the first in the market bring high prices. There are but few outer leaves and the plants may therefore be set closely together, they will then yield large crops, and as many as 14,000 heads have been grown of this variety on one acre, which brought a larger profit per acre than later and heavier varieties. The heads are very attractive in appearance, of splendid quality, tender, fine grained and of sweet, delicious flavor. Some space should be given in every garden to this variety, as coming ahead of every other kind, it is bound to make money for the grower. We control the entire stock of this earliest of all Cabbage. Pkt. 10c; oz. 30c; 2 oz. 55c; $\frac{1}{4}$ lb. \$1.05; $\frac{1}{2}$ lb. \$1.90; lb. \$3.50.

The Longest Keeper and Surest Header.

The grandest late Cabbage every introduced. This truly wonderful late variety of our own introduction gives the greatest yields of any Cabbage grown. Thousands of acres are annually sown with this one kind; it is a favorite among the largest and most discriminating growers everywhere and none of them have ever been disappointed in the results. Nine hundred and ninety-nine of every thousand plants will produce marketable heads, which are of mammoth size, on good, rich soil, reaching the sensational weight of 60 pounds each. The leaves are deep blue, very wide and overlapping each other, forming tight, compact heads, which are all very uniform in size and in time of maturity, and are of the most delicious flavor, crisp and sweet. It never bursts, has but few outside leaves and can be planted closer than most sorts and will then produce a larger crop per acre than any other variety. It is the best Winter keeper; there is no other variety which maintains its fresh appearance so long after it has matured. It is also the best for kraut. Buckbee's Christmas King is the finest late Cabbage known today; for the market, for shipping and for the home garden it has no superior. We have grown this variety for many years, but improved it continuously and it is today better than ever. We control the complete stock of Christmas King and offer the choicest "FULL OF LIFE" Seed of our own growing at the following prices. Send to Buckbee's for the true "Christmas King." Pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.25; ½ lb. \$2.25; lb. \$3.75.

Buckbee's "FULL OF LIFE" Seeds are the best that money can buy. Last year nearly all the Cabbage that people planted here made nothing on account of the dry hot weather but Buckbee's Christmas King Cabbage made fine heads.

Danish Grown Cabbages—Round Headed Varieties—Wonderful Keepers

Buckbee's Famous Great Dane

The Hardest Headed Late Cabbage. The Gardener's Favorite, the Best Shipping and Longest Keeping Cabbage.

We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed (grown by the originator in Denmark), at the following reasonable prices. Send to Buckbee for the true "Great Dane."

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply, and always at a price far above the ruling market rate. To get to the source of this supply we sent an expert to Denmark, who after careful inspection of the Cabbage-growing localities found at the Island of Amagar the GREAT DANE Cabbage, which he considered by far the finest and most productive of all the types and strains of the Ball Head Winter Cabbage grown in Denmark, and he contracted with its originator for all the seed he could supply. The stem is medium sized, heads are almost as round as a ball, of good size, perfectly solid, very fine grained, of the best quality. They average larger and heavier, also mature earlier than the other strains of Ball Head grown here.

Pkt. 10c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30; ½ lb. \$2.40; lb. \$4.15.

Danish Ball Head

Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.25; lb. \$3.95.

New Round Head Danish

A New Short-Stemmed Type.

The heads are beautifully white when trimmed. Is especially recommended for high and light soils and are splendid keepers. Short stems about 2½ inches high. The Round Head requires less space; can therefore be set closer together than Ball Head. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.25; lb. \$4.15.

RED CABBAGES

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities. Every home garden should contain at least a few plants of Red Cabbage. The housewife prizes them for pickling, salads and slaw; boiled down with a juicy apple, Red Cabbage makes one of the most delicious dishes. Red Cabbage for market is a profitable crop to grow. BUCKBEE'S FROST PROOF CABBAGE PLANTS

To get the advantage of these Frost Proof Cabbage Plants they must be planted a month or six weeks earlier than you would plant home grown plants.

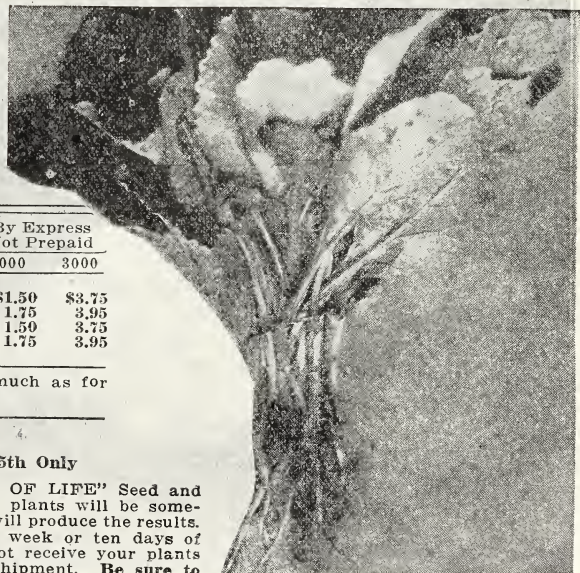

Following the variety name in each column below are complete scale of prices of 100 to 3000 plants. The prices which appear opposite each variety apply to that sort only and not to a combination of varieties. For example you can order 500 plants of any one variety at the 500 price but if you wish 500 plants of five different varieties you should remit for them at the 100 prices on each sort. Regardless of how many varieties you may order, figure the price of each separately, the same as though you were ordering that variety only.

BUCKBEE'S "FULL OF LIFE" CAULIFLOWER

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's Extra Early Chief.

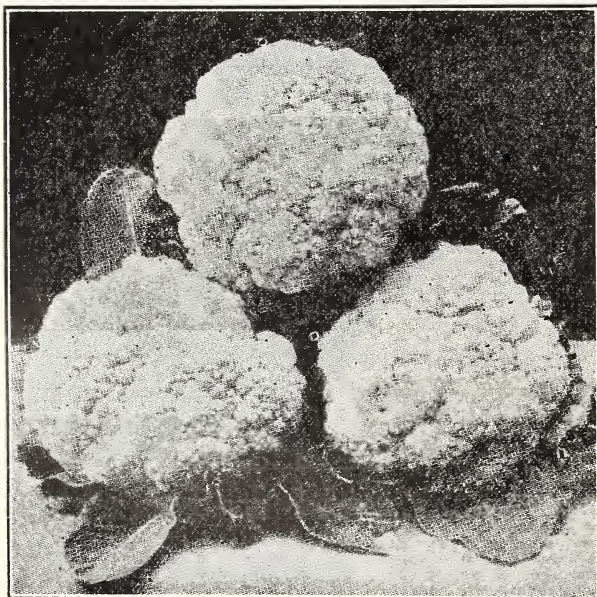

BUCKBEE'S EXTRA EARLY CHIEF CAULIFLOWER

The best variety for either market or family purposes, by far the earliest and surest large header and the most profitable grown. The greater part of Cauliflower seed offered is of European growth, but after years of careful study and perseverance we are able to offer this thoroughbred American variety—"CHIEF." It is of very compact growth, with very short stalks. The plants can be set very close together, and the leaves growing upward naturally protect the heads, which are handsome beyond description, measuring fully 12 to 15 inches across, and even more under careful cultivation; they are pure snow-white, very close, compact and of the most superior quality. The heads being so extremely solid and deep, weigh heavier than any other early variety. It can be used for early or late planting, for forcing or the open ground; used any way, we recommend it with the full assurance that it will give entire satisfaction and that it is not surpassed by any other variety in earliness and sure heading. In no vegetable is there so vital a relationship between seed and crops as in the Cauliflower. We make Cauliflower a specialty and we know Extra Early Chief will never fail to please the most exacting; it is a thoroughbred, pedigree-strain, the grandest, large-heading, early Cauliflower ever grown. We have sold it for years, supplying the largest Cauliflower growers with it in every part of this country and have received nothing but praise from everybody. Comparative tests have proved conclusively that Buckbee's Chief matures earlier, is a surer and heavier cropper and produces more marketable heads per acre than any other Cauliflower of equal size. No grower of Cauliflower need fear the outcome of the crop if he is relying on this superb, world-beating variety.

Prices of Buckbee's Extra Early Chief, pkt. 25c; ¼ oz. 90c; ½ oz. \$1.60; oz. \$3.00; 2 oz. \$5.50; ¼ lb. \$10.00, postpaid.

Early Favorite has never yet failed to please the most exacting grower and its rapidly increasing popularity is due entirely to its real merit and not to any special effort in its behalf. Give it a trial and we are sure you will never have reason to complain of the results. Pkt. 10c; ½ oz. 55c; oz. \$1.00; 2 oz. \$1.85; ¼ lb. \$3.50.

This is the strain used by gardeners and extensive growers in every large Celery district in the United States. No other strain of seed gives such universal satisfaction, and it is without question the most popular and dependable early strain of Celery grown. BUCKBEE'S EASY BLANCHING

The Easiest Blanching and Longest Keeping Celery Ever Grown.

A most valuable Celery of recent introduction. An entirely new and distinct variety, and the only easily blanched green or long-keeping sort known. Its remarkable combination of easy blanching and long-keeping qualities—not found in any other variety—make it at once the most valuable of all Celeries for those who grow for market as well as for all private gardeners, both for an early crop and for Winter use. The plants are of strong and stocky growth with green foliage, showing a slight tinge of yellow in the inner leaves. The stalks are very large, heavy, thick and solid with shallow ribs and with extra large and firm hearts. Easy Blanching is of most attractive appearance, largely on account of its large, finely colored heart, and the quality is superb, tender and brittle, with an excellent nutlike aromatic flavor. Pkt. 10c; oz. 50c; 2 oz. 95c; ¼ lb. \$1.75; ½ lb. \$3.25; 1 lb. \$6.00.

CELERICAC, OR TURNIP ROOTED CELERY

In this kind of Celery, the roots have been developed by cultivation and not the leaf-stalks. The roots, which are edible portion, keep well for Winter use and are excellent for soups and stews. They are also cooked and sliced as a salad. Sow seed at the same season and give the same treatment as common Celery. Transplant to moist, rich soil, in rows two feet apart and six inches apart in row. Give thorough culture. It is not necessary to earth up or "handle" the plants. After the roots have attained a diameter of two inches, they are fit for use.

Buckbee's New Delicattess—Root turnip-shaped; much larger, smoother and of more tender, sweeter taste, stronger flavor than other varieties. Pkt. 10c; oz. 35c.

THE BEST FIRST EARLY SWEET CORNS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

New Early Sunrise

Buckbee's New Early Sunrise

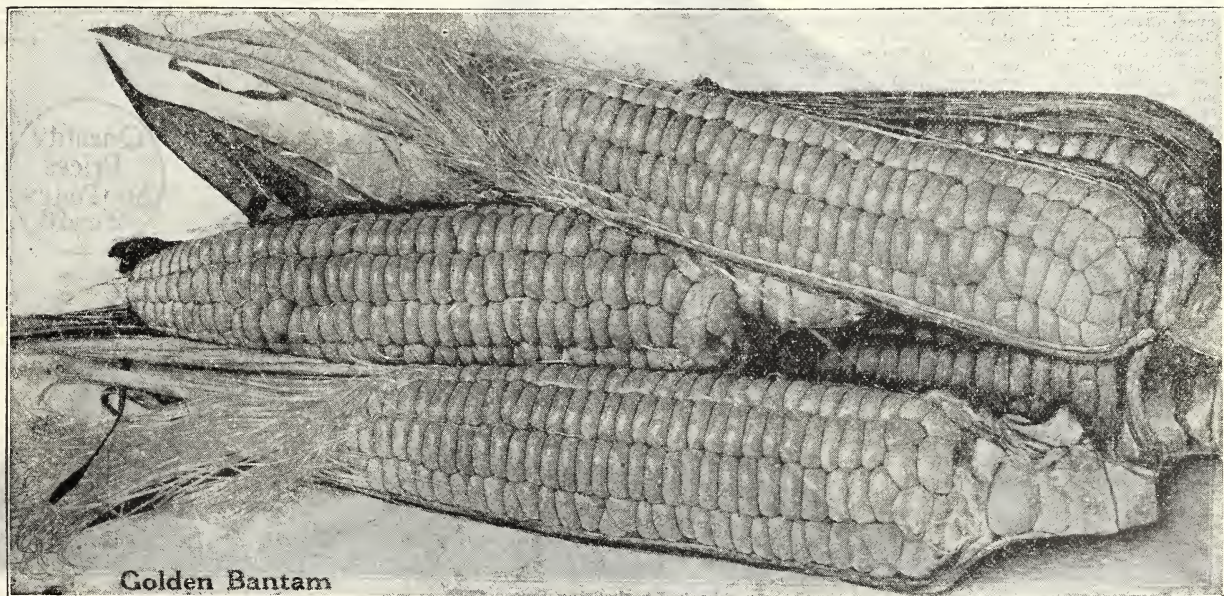

Absolutely the Earliest Good Sweet Corn

The beauty and quality of this remarkable variety give it prominence over all others for family, market, canning, shipping, and, in fact, all purposes. Ears large (the fat kind), grains of great depth, exceedingly tender and sweet, the sort that fairly melts in the mouth. Something in Sweet Corn that makes everybody talk Early Sunrise as the very best introduction to present date. Our seed stock is carefully grown and selected with the sole object of keeping it up to the highest standard of excellence as the earliest, largest and best on record. This is a very distinct variety, which was originated many years ago by a market gardener in northern Iowa. With us it always proved earlier than any other so-called extra early variety of other seedsmen. The ears are about 6 inches long, 10 to 12-rowed; they are very uniform and handsome and have a small white cob. Postpaid, pkt. 10; ½ lb. 25; lb. 40c.

Buckbee's Golden Bantam

A very early Sweet Corn, about ten days later than Sunrise; more hardy and can therefore be planted earlier than most other sweet corn. It grows 3½ to 4 feet high, produces two or more ears to the stalk; the ears, which are 6 to 7 inches long and covered with eight rows of golden yellow grain, are very tender and of exceptionally rich and delicious flavor. Golden Bantam has a distinct taste and many people prefer it to all other varieties. Market gardeners will find it a well-paying crop wherever it has been tried. Our stock has been carefully grown and selected. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c.

THE FIRST BEST EARLY SWEET CORNS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's New Golden Sunshine.

Buckbee's Everbearing

If You Want Delicious Corn on Your Table the Fourth of July Plant This Extremely Hardy, Early Maturing, Large Eared Sort.

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high; no small item to a gardener; and, as a proof of its quality and sweetness, we have a continuous call for "Everbearing" from our customers year after year. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks. Three or four dozen hills will supply a good-sized family for weeks. Postpaid, pkt. 10c; ½ lb. 22c; lb. 40c.

Improved Adams Early

A Popular Sort for Roasting Ears.

While not a sweet corn, this is a tender corn often used for the table, particularly in the South. The ears are about 8 inches long, 12 to 14-rowed, and the kernels are white, somewhat deeper than broad and indented at the outer end. The stalks are about 6 feet high. Can be planted earlier than any Sweet Corn. Postpaid, pkt. 7c; ½ lb. 17c; lb. 28c.

Buckbee's New Honey Sweet

A Most Desirable Second Early Variety.

With the possible exception of Buckbee's New Golden Sunshine, New Honey Sweet is the sweetest flavored corn grown. Of beautiful pearly white color, and only a week or two later than the Extra Earlies, this meets with ready sale wherever offered. Ears 12 rowed, medium size. Grains deep and cob small. Quality excellent, and stays fit for the table longer than many sorts. Add to all this the extraordinary sweetness, and you have a corn that is practically without a rival. Postpaid, pkt. 10c; ½ lb. 21c; lb. 38c.

Buckbee's New Golden Sunshine

The 12 Rowed Golden Bantam.

Early—Sweet—Prolific—Good Size.

This new Sweet Corn is a wonderful improvement over the popular Golden Bantam, as it is larger, sweeter, has 12 rows instead of 8 and is from 10 days to two weeks earlier. The flavor leaves nothing to be desired, as it is rich and sweet and never becomes tough and woody. There is a great demand for this variety and we were entirely sold out early last year, so order early if you desire one of the finest Sweet Corns you ever tasted. Pkt. 10c; ½ lb. 25c; lb. 45c, postpaid.

Buckbee's Selected Mammoth Early White Cob Cory

Famous for Earliness, Size and Sweetness.

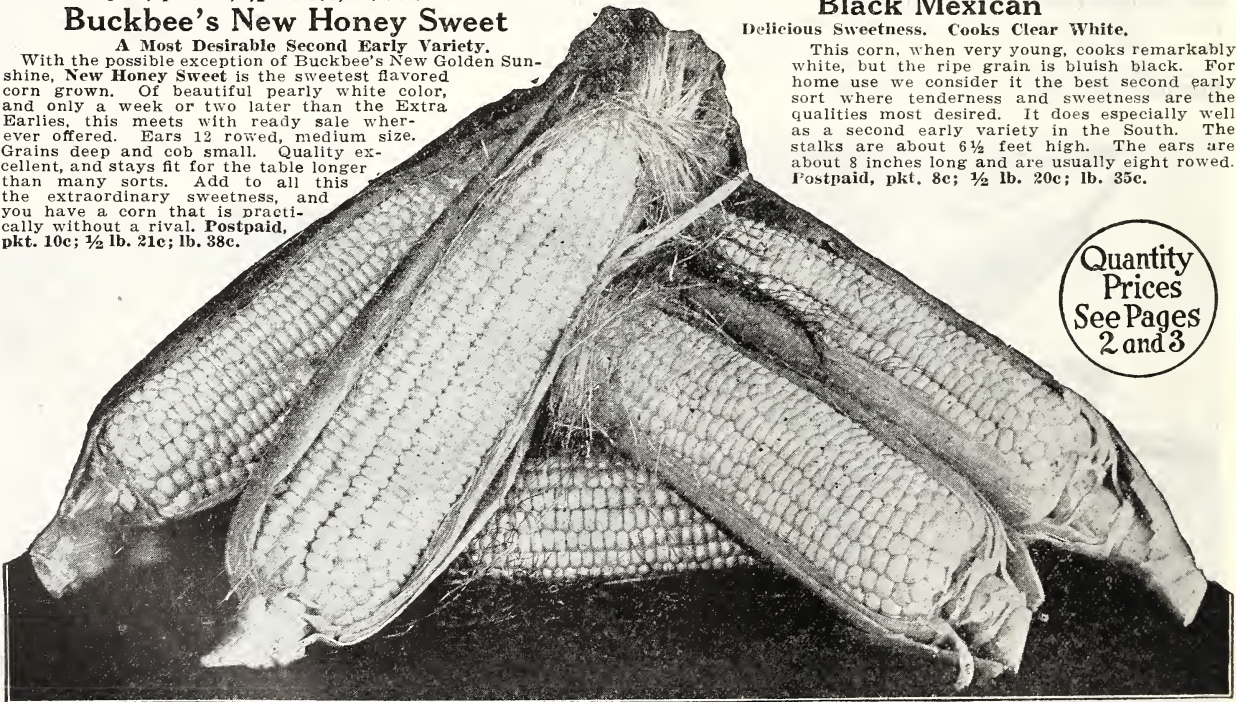

A very fine early variety but somewhat later than Buckbee's Early Sunrise, and is very largely planted by market gardeners to follow this variety; it has proven a well-paying crop for them. Mammoth Cory is a selection from the old White Cob Cory, but its ears are 12-rowed and the kernels set very closely together so that there is no lost space on the cob. The grain is large, broad, very white and of sweet, delicious quality. The plants are vigorous growers of medium height and are very prolific. This is a finely bred Sweet Corn with handsome symmetrical ears and is worthy a place in every garden. Postpaid, pkt. 8c; ½ lb. 19c; lb. 32c.

Black Mexican

Delicious Sweetness. Cooks Clear White.

This corn, when very young, cooks remarkably white, but the ripe grain is bluish black. For home use we consider it the best second early sort where tenderness and sweetness are the qualities most desired. It does especially well as a second early variety in the South. The stalks are about 6½ feet high. The ears are about 8 inches long and are usually eight rowed. Postpaid, pkt. 8c; ½ lb. 20c; lb. 35c.

BUCKBEE'S EARLIEST FORCING

The Earliest Lettuce Grown.

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large, loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground. The plants form a large, loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp and are of excellent quality. This is the earliest of all Lettuce; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. Pkt. 10c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75.

BUCKBEE'S MAMMOTH ALL HEAD LETTUCE

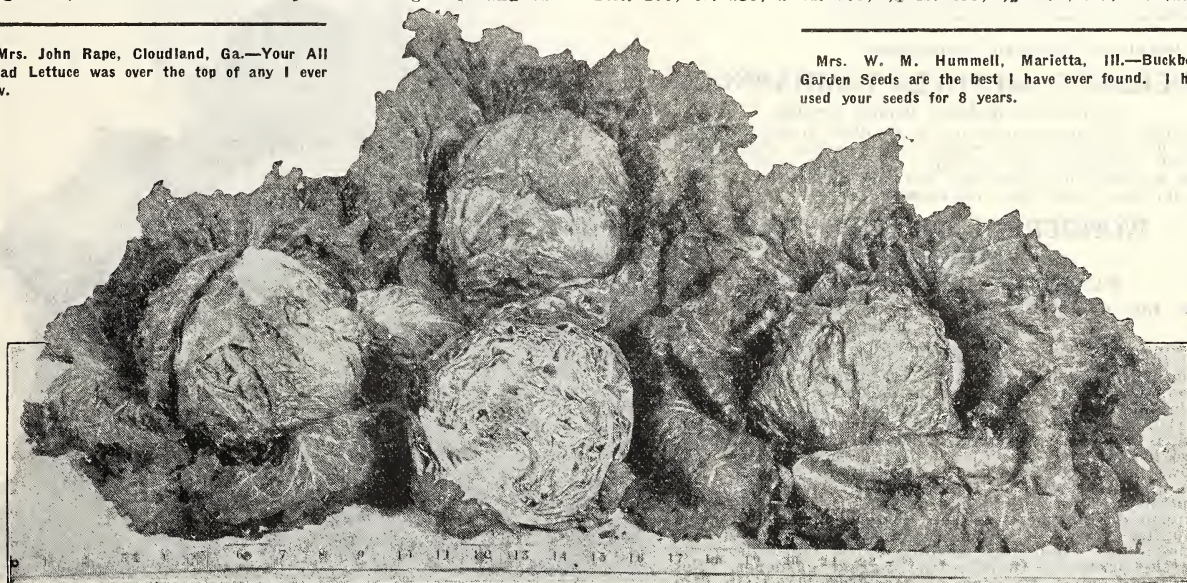

THE WORLD'S ONE UNBEATABLE HEAD LETTUCE

Entirely New and Distinct. The Most Wonderful Market Gardeners' and Shippers' Lettuce Known. The Best Smooth-leaved, Firm-heading, All-season Lettuce. Slow to Run to Seed, Unaffected by Hot Weather. A Sure Header and a Large Header.

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about ten days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is slow to run to seed, and will not scald or burn and will make a head when other varieties fail. In our repeated trials we have found it to be the best smooth leaved, firm heading Lettuce to grow through the summer months. Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have decidedly buttery flavor and are crisp, tender and sweet. This is the grandest, most valuable Lettuce ever introduced. There is no other variety giving such general satisfaction under so many varying conditions. Grown in the open ground, or forced in cold-frames or cool greenhouses, it produces a perfect head of extra large size, which never fails to please both grower and user. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25.

Buckbee's Ice Drumhead—The Longest Keeping Head Lettuce.

BUCKBEE'S ICE DRUMHEAD

A Sure Header, Slow to Run to Seed, Unaffected by Hot Weather. Crisp, Tender and Delicous. Absolutely Free from Bitterness. The Pure White Head Is of Good Size, and the Quality Cannot Be Equaled by Any Other Variety.

It grows rapidly; heads very early, only little later than May King, but the heads are much larger, as large as Summer Cabbage and as solid. The leaves are thick, broad, light green outside, changing toward the center from a golden yellow to a creamy white. The heads are as palatable as beautiful; very tender; never bitter; of deliciously sweet buttery flavor. Buckbee's Ice Drumhead is a sure header and an all header. It stands hot weather better than any other variety of its class. Can be used when quite young and until it runs to seed. It is immensely popular, especially in the Northern and Central States, and justly so, as it is unexcelled in its superb quality, beautiful appearance, heat resistance, keeping and shipping qualities. We control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 95c; 1b. \$1.75.

BUCKBEE'S IMPROVED TOMHANNOCK

WONDERFUL OR NEW YORK MARKET

BUCKBEE'S PEDIGREED SEED

The Big Money Maker. The Standard Summer Main Crop Hot Weather Head Lettuce.

A grand Head Lettuce sometimes called Los Angeles, furnishes fine, crisp lettuce during the hot summer months. This is one of the largest varieties grown, producing heads more than 15 inches in diameter and weighing more than 2 pounds each. The outer color is rich dark green, but the heart blanches beautifully and is crisp, tender and delicious. It is reliable, a sure header, and is slow to go to seed. Extensively grown in all sections of the country for summer use, but also planted in fall and winter, especially in the Southwest, from which thousands of carloads of it are shipped during the winter to Eastern cities. It stands shipping as well as Cabbage and remains in good condition longer than most heading sorts. Most desirable for the private as well as the market gardener. Not used for forcing. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; 1b. \$2.25.

BEAN

Buckbee's New Monarch Wax Bean

The Only "Sure Crop" Wax Bean Ever Grown.

Heavy Yields. Entirely Stringless. Large Pods. Beautiful Color. Sure Cropper. Crisp and Tender.

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by ½ inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean Buckbee's New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. We control the entire stock of Buckbee's New Monarch Wax Bean. Send to Buckbee's for choicest stock seed of our own growing; especially selected for disease resistant qualities. Pkt. 10c; ½ lb. 35c; 1b. 55c; 3 lbs. \$1.50. Postpaid.

Buckbee's New Extra Early Klondyke Lettuce.

LETTUCE

Buckbee's New Extra Early Klondyke

The Crisp as Ice Lettuce. Extra Early. Sure Heading. Long Keeping. Finest Flavor. Crisp, Tender and Delicious.

Besides being one of the most popular vegetables, the heading varieties of lettuce are used every day in the year. Our New Klondyke is distinct, having thick, dented outside leaves, with a beautiful creamy white or buttery center. Makes an extremely early, very solid head of good size and excellent quality. The outside color is a very desirable shade of green and the head is very compact for so large a variety, desirable shape and easily grown. Very fine and solid with incurving leaves, blanching the center quickly and satisfactorily. The quality is extra good, sweet and exceedingly crisp even in the hottest and driest weather. Can be grown with equally good results in the open ground for summer and fall use, or in frames or in the greenhouse for fall and winter use. Our New Klondyke, we believe, is the most dependable variety of lettuce that can be grown. Every one can be sure of head lettuce with this new variety. BUCKBEE'S NEW GOLDEN SWEET SPANISH ONION

The World-Beater Onion. Unusually Large, Sweet, and Desirable in Every Way.

Good Shipper. Large Globe Shaped. Nice Attractive Color.

This Onion was first grown in Spain where it was in great favor—the supply never being equal to the demand. A small supply of seed was finally secured and planted in this country, and we are now able to offer it to our friends. In general color and shape it resembles Prizetaker and Denia, but it is a distinct type and neither of those wonderful varieties can ever be compared with our Sweet Spanish. Color is a light yellow or straw color, the flesh pure white, of very fine grain and exceptionally sweet. As Denia is nearly twice the size of Prizetaker, so is our new Sweet Spanish twice the size of Denia. We have seen 7 Sweet Spanish Onions set side by side on a yardstick and reach from end to end. These same 7 Onions weighed over 16 pounds. An exceptionally good keeper, and if allowed to dry thoroughly, will stand shipping long distances. The size, however, is not the best feature—it is its sweet mild flavor. Can be used in any way that any other Onion can be used, and once tasted they always call for more. Send to H. W. Buckbee for genuine stock grown from originator's seed. Pkt. 10c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.25. Postpaid.

NEW WHITE SWEET SPANISH ONION

Identical to the above in every way except color which is pearly white. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.20; ½ lb. \$2.10; lb. \$3.75. Postpaid.

Buckbee's New Hearts of Fire Tomato.

BUCKBEE'S NEW HEARTS OF FIRE TOMATO

This Grand New Tomato Is as Nearly Perfect as Any We Have Ever Seen. Fruits Are of Uniform Size, Heavy, Solid, Attractive, Sweet, Smooth, and of Unequalled Flavor.

Too much praise cannot be given this Tomato, as it is in a class by itself, being equally desirable for any use for which Tomatoes are grown. Its perfect shape and color commend it to the market; its size, quality and flavor make one of the best for all table uses, and its earliness, solidity and productiveness make it valuable for the canner. It is surely a wonder Tomato, and can be used for market canning or home garden. The vines are strong growers, but not rampant enough to decrease the yield of the fruits. On the contrary this New Tomato is one of the heaviest yielders we have. The fruits are large, often weighing a pound or more and are perfectly smooth, and seldom crack. Color is a rich, bright crimson and penetrates clear through the fruit. There are few seeds, making nearly solid flesh. Shape is well shown by illustration. Matures very early for such a large variety and continues to bear its large, solid, smooth, finely shaped fruits until the plants are killed by frosts. We control the entire stock of this Tomato. Pkt. 15c; $\frac{1}{2}$ oz. 25c; oz. 45c; 2 oz. 80c; $\frac{1}{4}$ lb. \$1.50.

BUCKBEE'S NEW JUMBO KLECKLEY WATER MELON

The Acme of Perfection—Half Again as Large as the Original Kleckley.

For years we have been trying to get a Kleckley Melon of large size without sacrificing quality. In our new Jumbo Kleckley we have a wonderful yielder under almost any conditions of weather and soil. Melons are large and solid, sweet and juicy and can be eaten almost to the rind, which, though thin, is tough enough to stand handling. This Perfected Melon is the true Kleckley shape and has the same deep green skin which has always made them so attractive when displayed in the market. Add to this the extra large size and you have a truly wonderful fruit. Notwithstanding its large size, it is solid and firm and does not crack easily. Flesh is bright red, and of excellent quality. When we first introduced this Melon, it was met with favor everywhere, and the demand for seed now exceeds that of any other variety excepting Buckbee's Monte Cristo. We have a splendid supply of seed, still we advise early orders to avoid a possible disappointment. Send to Buckbee's for true stock seed.

Big, Compact, Tender, Creamy White Heads. Quality Is Exceptionally Fine; One of the Best Keepers We Grow.

A very popular variety for Market Gardeners. It heads well in the open ground during cool weather in Spring and Fall and is grown very extensively in the South for shipping North during the Winter. The leaves are thin, hard and crisp, comparatively smooth but wavy at the edges and are of bright light green color, slightly tinged with reddish brown. The inner head blanches to an attractive greenish-white. The quality is excellent. Our seed of this famous variety is used by thousands who purchase it year after year, testifying by that to its wonderful quality. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

BUCKBEE'S NEW GIANT WONDER GEM

An Entirely New and Distinct Melon, Magnificent in Every Respect, the Largest in Size and Finest in Quality.

Resembling the old Emerald Gem in shape, color and flavor. Buckbee's New Giant Wonder Gem, however, is much larger; in fact, it is the largest good melon growing, weighing under ordinary conditions as much as seventeen and eighteen pounds each and with special care much more, and it is also much more netted and of good shipping quality.

The melons are globular, slightly flattened, deeply but irregularly ribbed, covered more or less with shallow netting; the skin is of rich emerald green color while young, becoming slightly tinged with yellow as the fruit matures. The flesh is of deep, rich salmon color, about 3 inches in thickness, thicker than the flesh of any other sort we know of; the melon is indeed almost all solid meat, the cavity being very small, hardly large enough to accommodate the seeds. Sterling quality and luscious flavor. Vines vigorous, resisting the attacks of insects and blight.

Sells at good prices, as they closely resemble in appearance and flavor the large, greenhouse grown melons sold at fancy prices at the fruit stands. Pkt. 10c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75, postpaid.

BUCKBEE'S NEW STRAWBERRY

Delicious Quality; Rich and Spicy, with the True Strawberry Flavor.

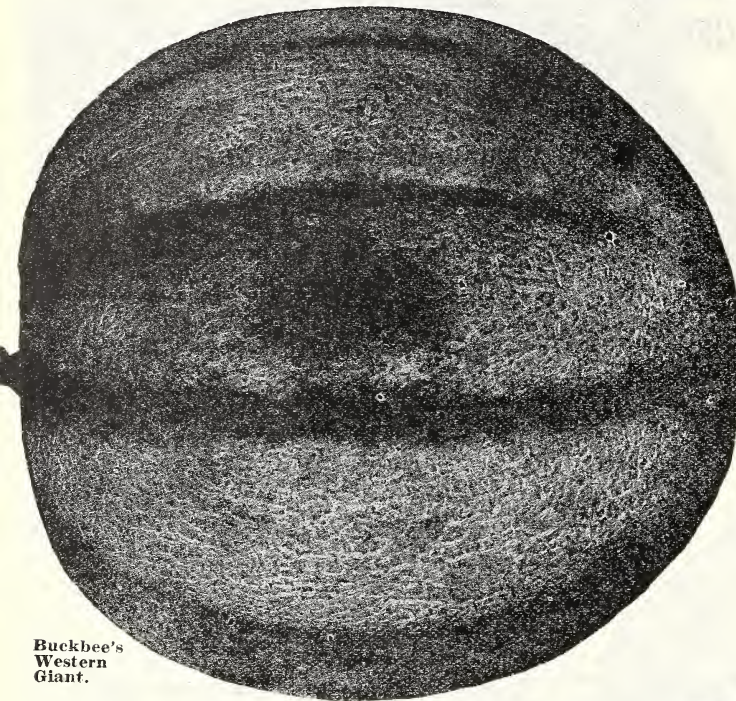

Flavor like that of a strawberry, hence the name. It grows to be a desirable market size; the fruits weigh from 5 to 7 pounds each. Its outside appearance compares favorably with the green nutmeg of old, turning to a yellowish hue, as it were, over night, when fully ripened. Its smooth, deep flesh is of an attractive pinkish-rose color, particularly soft and melting, and with that exceptionally delicious strawberry flavor leaves nothing more to be desired in a musk melon. Mr. Beck, the veteran melon grower, who honored us with the introduction of the Strawberry Musk Melon, writes: "This grand melon was originated by planting the most luscious variety of strawberries between every other row of a New Hybrid Musk Melon that I had previously perfected." We can heartily recommend Buckbee's Strawberry as having no superior as a home garden and market melon. While the stock of this new acquisition is but limited, we are going to offer it as follows as long as our seed supply lasts. Price, choicest seed of our own growing. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$1.95.

BUCKBEE'S NEW VICTORY MUSK MELON

The Earliest, Sweetest and Best Melon for the Table or Market.

This world-beating Musk Melon originated on Buckbee's Seed Farms and was first offered by us in 1920. Nearly a quarter of a million of our friends tried this wonderful Melon last year and we feel confident that the demand will continue to increase. Medium size, oval shaped, practically disease resistant, heavily covered with grayish brown netting. The color of the flesh is bright salmon; very firm and ripens close to the rind. The seed cavity is unusually small, the entire fruit being practically sweet, solid flesh. Flavor is the finest of any Melon ever grown on our Rockford Seed Farms, being sweet and spicy, tender and stringless. The melon is nearly all flesh, the interior being very small, hardly large enough to accommodate the seed. In flavor it is simply unexcelled and it certainly justifies its name by its past experience and real merit. It is so thick fleshed that one melon is enough for two or three people under ordinary circumstances, and in a patch of an acre or more you can find hundreds of melons that very closely resemble the large French melons sold on fruit stands. Matures in 75 days. For the home garden or near market trade it is unsurpassed. We control the entire seed supply of Buckbee's New Victory Musk Melon and would suggest that you order early. Postpaid, pkt. 10c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75.

New Bush Musk Melon.

New Honey Dew Melons

Wonderful New Melon for Fall and Winter. The Sweetest Melon Ever Grown. Always in Demand at Fancy Prices.

A new type of melon, a cross between a Cantaloupe and a Cassaba. The fruit is oval-shaped, about 6 inches in diameter and 7 to 8 inches long, weighing from 8 to 10 pounds each. It ripens about two weeks later than Rocky Ford Cantaloupe and in the North it should be started in hot beds to give plenty of time to ripen. The skin is smooth, dull white when ripe. The rind is thin but tough. The flesh is thick, of rich very sweet flavor. This melon has been appropriately named; it is of a distinct honey-like flavor, more luscious and juicy than any other Musk Melon. It is the best keeper and shipper of all and will stay in good condition from three to five months after it is ripe; melons not ripe when frost comes may be stored in a cellar and will there ripen slowly and can be used all winter.

Buckbee's Golden Ball

Or Yellow Meated Japan.

This is by far the finest, most luscious and pleasing Musk Melon ever grown. The vines are hardy, permitting earlier planting, very prolific, and produce very large fruits, nearly as early as the smaller varieties. The melons are nearly round, not deeply ribbed and covered with patches of netting. The skin is yellowish white when ripe. The crowning feature of this melon is found in the thick, melting, delicious, salmon-colored flesh. It is extremely rich, sweet and highly flavored. We know of no other sort which will give as great satisfaction as our Yellow Meated Japan Musk Melon. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

New Bush Musk Melon

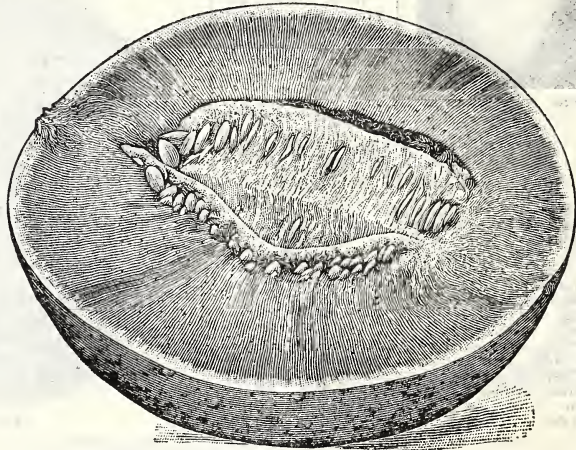

The Vineless Gem of the Garden.

The bush habit of growth of this new variety enables it to be grown in small gardens, where the vine sorts could not be grown for lack of room, and they yield about twice as much on the same piece of land as the vine sorts. The fruits are of the popular "Jenny Lind" type, but larger, averaging 5 inches in diameter; they vary somewhat in shape from flattened-round to almost spherical; the ribs are shallow, the surface is dark green, but so densely netted that it appears almost russet colored. The flesh is very deep, edible almost to the rind and is colored light green flushed with salmon towards the center. The seed cavity is small. The quality is superb, lusciously sweet and juicy, with a cool, gratifying flavor and a delightful aroma. They ripen a little in advance of "Rocky Ford." The plants grow from 15 to 18 inches in length and two or three plants can be grown in a hill 2½ to 3 feet apart. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 85c.

Buckbee's New Winter Pineapple or Valencia Christmas Melon

The Best Long Keeping Melon. They Will Keep All Winter.

A great acquisition and destined to become a standard vegetable. These are late maturing Musk Melons, which are largely grown in California, and hundreds of cars of them are shipped from there to the East every year. They do not ripen on the vines in the North, but are gathered there before freezing weather and if properly stored all Melons, even half grown ones, will ripen gradually. Sow and cultivate like other Musk Melons. Do not pick until the light streaks become quite yellow. Stow away so they do not touch each other in a cool, dark, dry place. When the rind becomes slightly softened and moist they are ready to eat. Some of the Melons will actually keep until February. The seed cavity is small and the flesh thick, of fine texture, juicy and palatable to within one-quarter inch of the skin. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.50.

BUCKBEE'S RARE AND DELICIOUS MELON NOVELTIES

Queen Ann's Pocket Melon

Sweet Scented or Melon Pomegranate.

A pretty climbing variety; fruit round, size of an orange, of yellow color, striped and spotted red. Flesh not edible; grown for ornament and its agreeable pungent fragrance, sweetly perfuming the room for days. Trained on trellises or arbors it is very ornamental. It is easy to grow. Cultivate like Musk Melons. Pkt. 10c; oz. 25c.

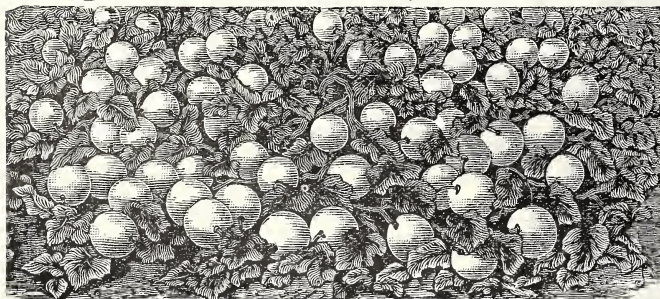

The Mango Melon or Vegetable Peach

Very striking in color, most wonderful yielder. Vines of Mango Melon are somewhat smaller than the Musk Melon, requiring same cultivation. Fruit about the size, shape and color of an orange, somewhat russeted. For sweet pickles, pies or preserving they are splendid. In the West and Northwest, where fruit is scarce, they are rapidly becoming popular, as they are easily cultivated, enormously productive, and can be used in every way as the Peach, except that they are not quite as sweet and are not used raw. Pkt. 10c; oz. 25c.

Buckbee's New Garden Lemon

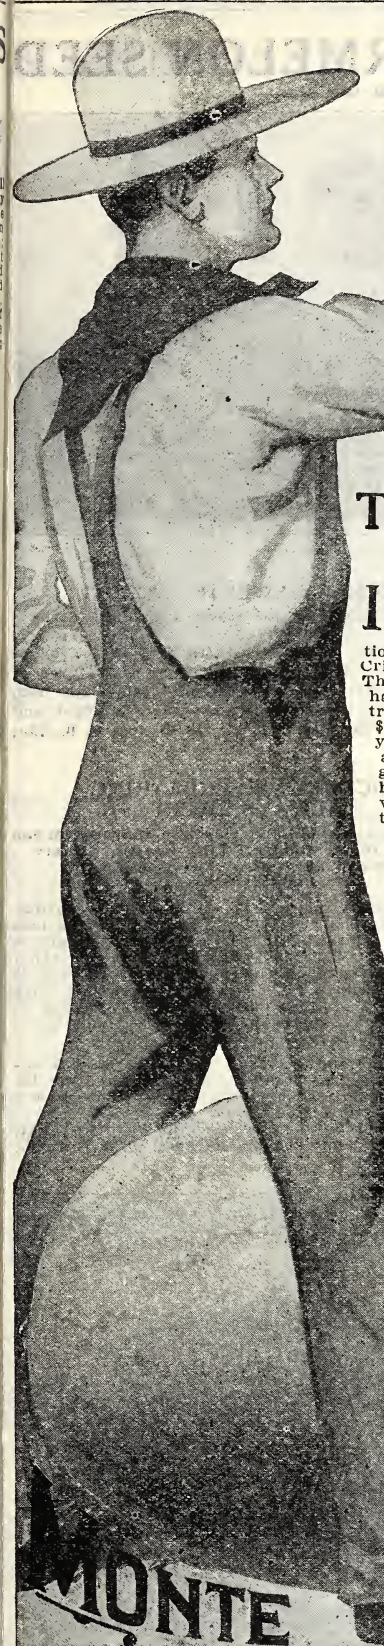

Resembles the Mango Melon in manner of growth, but is distinct in that the unripe fruit is striped with very dark green spots, nearly black, and when ripe is not russeted. Fruit a trifle smaller than the Mango Melon. Has a finer flesh and most desirable acid flavor, thus dispensing with sliced lemon, which is so important in putting up the Mango Melon. Unexcelled for general canning purposes. Cultivate similar to Musk Melons. It is an enormous yielder. Pkt. 10c; oz. 35c.

This grandest of all varieties has been extensively grown the past few seasons in almost every melon growing locality of the world, and in not one single instance has it failed to meet the expectations of the planter. The reports received from every section, that all are delighted with it, prove that in the hands of our customers Buckbee's Monte Cristo has given the same surpassing results as in our careful trials on Rockford Seed Farms. The greatest yielder. The sweetest, juiciest, crispest and most solid Melon ever produced, never having a hollow or pithy center when ripe. The easiest to sell on the market, for when once tried, people will have no other. Many of our customers have written us, that they have cleared \$100 or more per acre by growing Buckbee's Monte Cristo Melons. Under average cultivation you can do as well or better. Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds offered in this book. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. While our supply of seed is fairly large, we always have advance orders from our customers, who have planted Monte Cristo in past seasons and we would advise all who care to plant this "King of Melons" in 1920 to place their orders as early as possible. Buckbee's Sure Crop Mushrooms

GROWING MUSHROOMS IS NOT DIFFICULT

Get Reliable Spawn. Start Right and the Results Are Certain and Profitable.

We furnish every buyer of Mushroom Spawn with explicit directions for growing. If they are followed, nothing is so certain as big success.

The Mushroom is a delicious, edible fungus. It produces no seed, but instead a white fibrous substance in broken threads called spawn, which is developed and preserved in horse manure and pressed in form of bricks.

No expensive equipment is or ever will be necessary for the propagation. The plain fact is that anyone who starts right can grow Mushrooms successfully. An abandoned outhouse, or waste space in one, a shed, a basement or a cellar can be used for growing Mushrooms and will answer the purpose excellently.

BUCKBEE'S PRIZETAKER

**Beautiful Color—Ideal Size—Uniform Shape
Exceptionally Good Keeper. Wonderful
Flavor. Always at Its Best.**

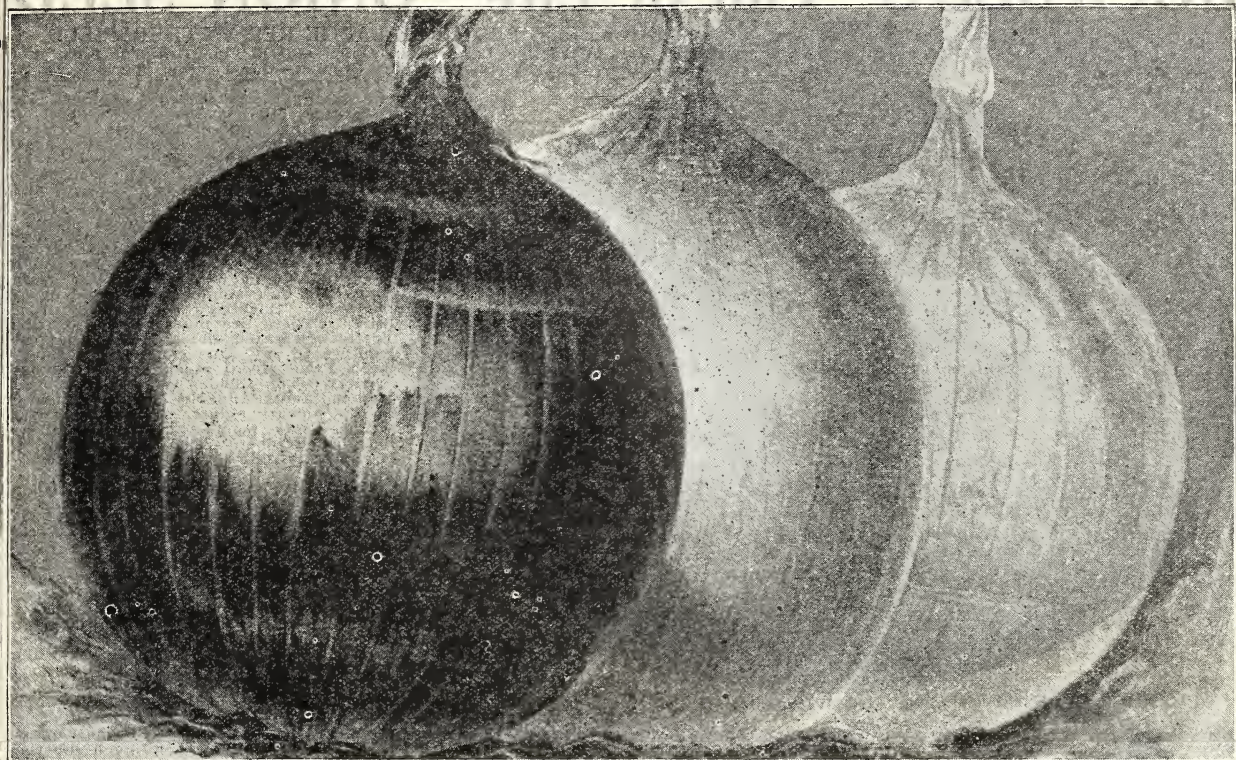

Unexcelled for Home Use or the Market.

Buckbee's Genuine Prizetaker Onion has proved itself to be one of the handsomest and most productive large Yellow Globe Onions which are grown extensively today. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year round. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an "Award of Merit" from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so. The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is rather pale yellow, the flesh pure white throughout. It is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared it is unsurpassed. The various strains, good, bad and indifferent that are generally offered to the unwary planter come to maturity all the way from August up until as late as October. This unreliability of cropping is very disastrous to most localities.

THE GREATEST OF ALL RED ONIONS

The seed which we are offering is of the earliest maturity, grown from hand-sorted bulbs that will produce Onions of immense size; $1\frac{1}{2}$ to $2\frac{1}{2}$ -pound Onions from our seed are of frequent occurrence. BUCKBEE'S RED WETHERSFIELD grows with unusual regularity, scallions being unknown. It is a magnificent keeper. An enormous cropper—700 to 1,000 bushels have frequently been raised upon a single acre. The shape is accurately shown in our illustration. In color the skin is a deep rich, purplish red, while the flesh is of a beautiful white, firmly grained and of good flavor. Our customers throughout the country endorse it as the best Red Onion ever grown.

The King of White Onions—Its Mildness of Flavor and Tenderness Are Unsurpassed.

The largest white Onion. Grows to a remarkable size—average diameter is from 5 to $7\frac{1}{2}$ inches. Single bulbs often attain weights of over 4 pounds each. There is no other white Onion which attains such mammoth size. The shape is flattened, but thick through. The skin is of a beautiful silvery white. The flesh is of a snowy white and is of a particularly mild and pleasant flavor. Being a sure cropper, producing immense Onions and enormous crops which bring the highest prices, this variety has been a great money-maker for the grower; but its fine, mild flavor makes it also most desirable for the private gardener. Send to Buckbee's Rockford Seed Farms for tested pedigree seed. Pkt. 10c; oz. 25c; 2 oz. 40c; $\frac{1}{4}$ lb. 75c; $\frac{1}{2}$ lb. \$1.30; lb. \$2.50.

BUCKBEE'S PEDIGREED "Full of Life" ONION SEED FLAT VARIETIES

NEW WHITE PORTUGAL or WHITE SILVERSKIN

The Standard White Onion for Market and Family Use

Medium size bulbs of flat shape, which ripen evenly and quite early—about 10 days earlier than Southport White Globe. They are of handsome appearance; have a clear, white skin as beautiful as glistening silver. The flesh is of mild, delicious flavor. For keeping, this is the best of all white varieties.

A gardener who does not care to plant more than one variety should use this one, and everyone should make a liberal sowing of it for continuous use. These Onions make fine bunching of Green Onions and are also grown for the market as large White Onions. They are also much used for pickling and for Onion Sets. Buy your seeds from first hands. Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 7c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25.

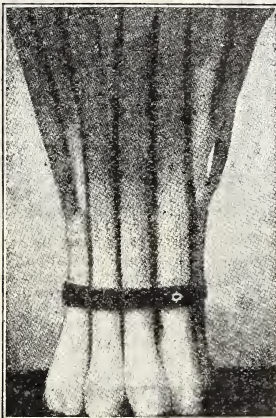

EXTRA EARLY WHITE QUEEN OR WHITE PEARL

A silver-skinned variety of remarkably quick growth. Small bulbs, flat, of mild flavor. Particularly valuable for pickles. Pkt. 7c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.45.

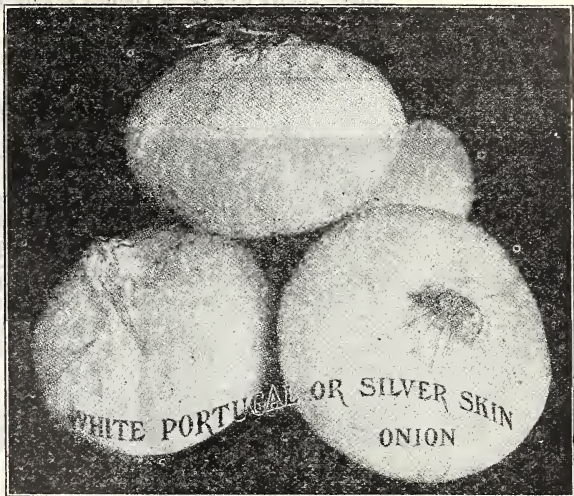

BUCKBEE'S WHITE PICKLING

Nothing Earlier in Onions.

This distinct variety is the very earliest Onion in cultivation. Of a pure paper-white color, very mild and delicate in flavor; from 1 to 1½ inches in diameter and ¾ of an inch in thickness. Its extreme earliness makes it very valuable for early table use as well as bunch Onions for market. Pedigreed stock seed. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

Early White Welsh.

EARLY WHITE WELSH (For Green Onions)

A most desirable green bunch Onion. It does not form bulbs, only enlargements at the base of each shoot, which are quite attractive and, being extremely early, sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial can remain in the ground for years. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c.

AUSTRALIAN BROWN

Long Keeping. Fine Quality.

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh white, mild and agreeable. A sure cropper. Pkt. 7c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.40.

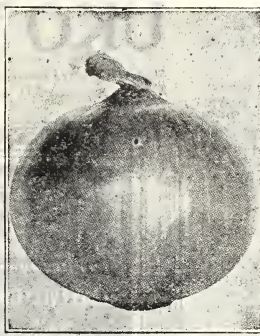

EBENEZER OR JAPANESE

Mild Flavor; Excellent Keeper; Heavy Yielder.

Those who want a nice mild Onion for their own use would do well to try the Ebenezer, as it is the mildest flavored Onion we have ever tasted. The flesh is white, firm and of a very delicate flavor. The Onions are large, somewhat flattened, yellow skinned and have very small tops and mature early. They will keep sound and hard all winter. Pkt. 8c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.50.

Buckbee's Genuine Bermuda Onion Seed

Bermuda Onions are largely grown in the South and have proven a most profitable crop. They are planted there in the fall and shipped North in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1 inch in size.

CRYSTAL WHITE WAX—This new variety is a large, pure-white flat Onion. It is the earliest and most popular Onion with the large growers in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slicing, the color being so clear and pure. Our stock seed each year is imported direct from Canary Islands, where the only True Bermuda Seed is grown. We spare no labor or expense to have our stock "Full of Life" and the best that can be obtained. Pkt. 10c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. \$1.65; lb. \$3.00.

WHITE OR YELLOW BERMUDA—Bulbs broad and flat in form. The color is not a clear white, but rather a pale straw; flesh crisp, solid and mild, early ripening. Pkt. 10c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50.

RED BERMUDA—Similar in form and early ripening to the Bermuda White, but grow larger in size, ranging from 3 to 4 inches in diameter; very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.50.

Onion Plants Will Be in Limited Supply This Year and We Would Advise Early Orders

Many thousands of our customers have learned, during the last year, of the great saving in time which results from planting Onion Plants instead of Sets. For those who desire an early crop, either for table use or local marketing, these plants will prove most desirable, and the fact that they are inexpensive and call for the minimum of labor and trouble in producing the crop has created an ever-increasing demand for them. When it is known that the set has to be absorbed by the new growth before it begins to form the new Onion, while the plant begins to grow as soon as it is planted and makes more headway than the set, producing delicious new Onions for table use far more quickly, the time saving can be appreciated. Onions grown from plants are larger and do not run to seed as sets often do. They may be set out at the same time you would Onion Sets or Cabbage Plants. Plant in rows about 15 inches apart, the plants 3 to 4 inches apart in the row. Plants cannot be pulled or shipped when beds are wet. Sometimes a week or ten days of continued wet weather will prevent the shipment of plants so, should your shipment be delayed, you will know what is the cause.

BUCKBEE'S "FULL OF LIFE" ONION SETS

BUCKBEE'S NEW YELLOW POTATO

Excellent for Green Bunching Onions—Very Early and of Rich, Mild Flavor.

Of golden yellow color, excellent quality and good keepers. The bulbs produce clusters of small ones often as many as twenty from a single bulb. Onions are ripe much before any other variety. Excellent for Green Onions and also for pickling. This is the Onion to plant for all purposes. We have grown an unusually fine lot of sets this year and although there is a short crop, the quality is the finest we have ever had. Postpaid, 1/2 lb. 25c; 1 lb. 45c; 3 lbs. \$1.20.

EGYPTIAN OR PERENNIAL TREE WINTER SETS

This variety never forms a large bulb. Its value lies wholly in its special adaptability to produce green Onions for Spring or Fall uses. It is perfectly hardy, and when once set out will come up year after year. Can be planted either in Spring or Fall. We can supply these sets for shipment from September 1 to the following March. This variety increases by producing sets at the top of the stalk and does not produce seed. Postpaid, 1/2 lb. 18c; 1 lb. 30c; 3 lbs. 80c.

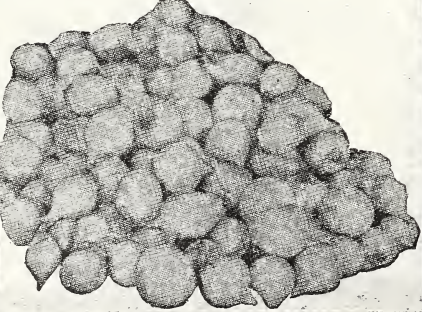

BOTTOM ONION SETS

Bottom Onion sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seed. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the sowing of another crop on the land the same year. Every private garden should contain a sowing of sets.

BUCKBEE NEW SUGAR PARSNIPS

PARSNIPS

The value of the Parsnip as a table vegetable is well known but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots, more nutritious than turnips and very valuable for dairy stock. Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow and uneven in growth, it should be sown as early as possible in drills $2\frac{1}{2}$ feet apart; cover $\frac{1}{2}$ inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to 6 inches apart in the row.

BUCKBEE'S NEW SUGAR

Parsnips are one of the few Winter vegetables. The roots are hardy and are improved in flavor by the action of the frost.

After repeated trials at Rockford Seed Farms we have no hesitancy in offering Buckbee's New Sugar as the best Parsnip grown. Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine grained and of the most excellent quality. A magnificent cropper, yielding as high as 750 bushels per acre under good cultivation. You will not be disappointed by planting BUCKBEE'S NEW SUGAR PARSNIP. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; lb. \$1.50.

NEW MALTESE

A wonderfully fine strain. The roots do not grow as long as the Hollow Crown, but are of greater diameter and more easily gathered. Very heavy cropper. Flesh fine grained and of most excellent quality. Pkt. 6c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 55c; lb. 95c.

IMPROVED HOLLOW CROWN

An excellent variety for the table. The roots grow to a length of about 15 inches with a diameter at the top of 3 inches. Very productive. Pkt. 5c; oz. 12c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 50c; lb. 90c.

PARSLEY

Parsley is used for seasoning soups and stews, for salads and for garnishing; also for ornamental borders in the flower garden. The green leaves are used for flavoring as they may be dried crisp, rubbed to powder and kept in bottles until needed.

Parsley succeeds the best on rich, mellow soil. The seed is even slower than parsnip in germinating and should be sown as early as possible in the spring, in drills 1 to 2 feet apart, covering not more than $\frac{1}{2}$ inch with fine soil firmly pressed down. When the plants are well up thin 8 to 12 inches apart in the row. When the plants of the curled varieties are about 3 inches high cut off all the leaves; the plant will then start a new growth of leaves which will be brighter and better curled; later if these turn dull or brown they can be cut in the same way; every cutting will result in improvement.

BUCKBEE'S BEAUTY

Leaves Are Finely Cut, and Heavily Curled. Foliage Is Very Attractive, and Uniformly Emerald Green.

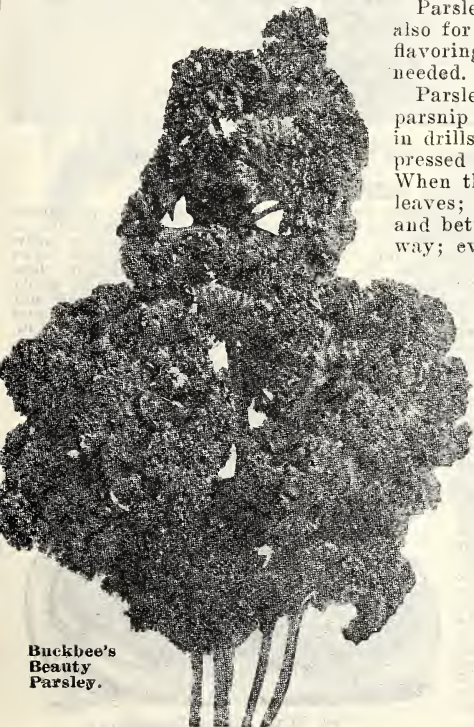

A distinct and handsome variety of quick, robust growth forming compact, ornamental plants, densely furnished with strong-stemmed graceful leaves, finely cut, most beautifully curled, and of that brilliant emerald green color so highly attractive when used for garnishing. The flavor of the leaves is also unusually rich and aromatic, rendering this variety of special value where used for flavoring, in sauces, dressing, etc., either when fresh or dried. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 75c; lb. \$1.25.

NEW MOSS CURLED

Invaluable as a garnishing plant and suited for mixing with dwarf, ornamental foliage plants in the garden. This is a vigorous, compact growing variety, excellent for garnishing and flavoring, and a handsome decorative plant. The leaves are very finely cut and so closely crisped or curled as to resemble bunches of moss. Owing to its uniformly fine deep green color and very attractive foliage, this is one of the most popular sorts for both market and home garden. Pkt. 7c; oz. 12c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 50c; lb. 90c.

HAMBURG TURNIP ROOTED

The edible portion of this variety is the fleshy root which resembles a small parsnip and has a flavor similar to Celeriac; it is extensively used for flavoring soups and stews. Large pkt. 8c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c.

BUCKBEE'S "Full of Life" PEANUTS

Our "Full of Life" Peanuts Are Grown for Seed Purposes Only and Are the Finest That Can Be Grown.

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, but now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a hundred million bushels of Peanuts have been ground up by oil mills for oil and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 80 gallons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanut oil is fully equal to olive oil and Peanut meal makes hard hog-flesh. The Peanut Family contain a larger percentage of oil than the other legumes and are wanted by the oil mills who now pay a higher price for a bushel of them than for cotton seed. In the South, especially on a sandy land, Peanuts will supplant cotton as a money crop, being more profitable. The cultivation of this crop is also every year extending farther north, and on suitable soil in the northern states Peanuts will make a profitable crop for stock feed where Indian Corn thrives and with a season of only four months free from frost.

Plant in rows $2\frac{1}{2}$ to 3 feet apart and 6 to 8 inches apart in the rows. The Seed Peanuts are planted either shelled or in pods, using $1\frac{1}{2}$ peck of shelled or 2 bushels in pods per acre. The pods may also be broken in 2 parts, soaked in water and then planted at once. The larger varieties are mostly planted shelled at the rate of $\frac{1}{2}$ bushel per acre. Planting must not be done until the weather is warm. Cultivate until they begin to form pods. When they mature pull them up, turning the roots to the sun. In bright weather they will be cured in 24 hours. They must be pulled before frost.

NEW MAMMOTH VIRGINIA

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier, yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season. The standard variety for roasting. Postpaid, pkt. 8c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; lb. 40c. By express, not prepaid, 5 lbs. \$1.50; 10 lbs. \$2.50.

NEW EARLY LONG POD BUSH

Originated by one of the best Peanut growers in the South and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on most all kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish Peanuts. The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Well adapted for stock feeding. Postpaid, pkt. 10c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; lb. 45c. By express, not prepaid, 5 lbs. \$1.75; 10 lbs. \$3.00.

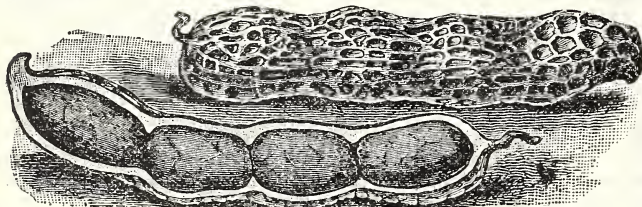

Famous TREE Tanglefoot

A harmless, sticky compound for banding fruit and shade trees, as well as grapevines. Prevents insects climbing the trunks and destroying buds, foliage, etc. Endorsed by foresters and horticulturists. Also valuable for use after pruning and trimming to protect wound. Used in all forms of tree surgery. Keeps perfectly in original package without drying.

Postpaid, 1-lb. can, 65c. By express, not prepaid, 5-lb. can, \$2.75; 10-lb. can, \$5.25; 25-lb. wooden pail, \$11.00.

A Single Plant—New Mammoth Virginia Peanuts.

New Early Long Pod Bush Peanut.

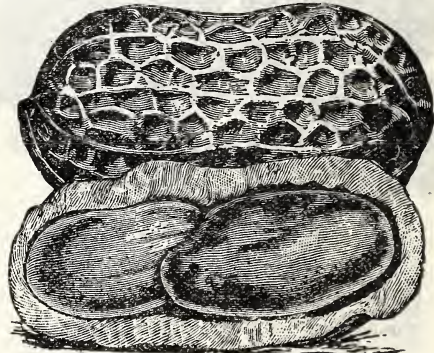

Spanish Peanut.

SPANISH PEANUT

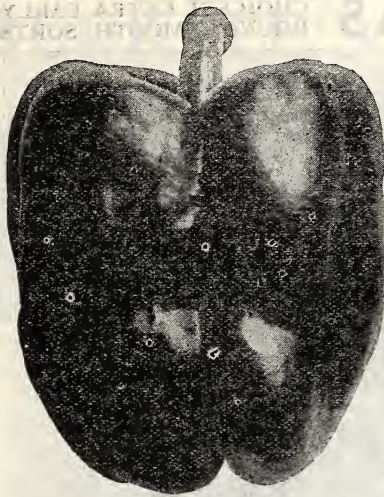

The earliest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant and heavy foliage; the pods cluster at their base. Pods are small but well filled with nuts of sweeter and finer flavor than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 100 bushels of nuts have been harvested. Can be cultivated with the plow. Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. Postpaid, pkt. 7c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 22c; lb. 35c. By express, not prepaid, 5 lbs. \$1.25; 10 lbs. \$2.00.

NEW DIXIE GIANT

The Jumbo of the Peanut family; owing to its extremely large size and handsome appearance is very desirable in every market, always bringing fancy prices. Plants grow about 18 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pops. Should yield a gallon of nuts to one kernel planted. Postpaid, pkt. 10c; $\frac{1}{4}$ lb. 18c; $\frac{1}{2}$ lb. 30c; lb. 50c. By express, not prepaid, 5 lbs. \$2.25; 10 lbs. \$4.00.

GIANT LAXTONIAN OR BLUE BANTAM

Very Early—Extra Large Podded—Heavy Yielder—Sweet Flavored.

A giant podded, dwarf, extra early pea. The most valuable Pea introduced in many years. This handsome new wrinkled Pea is the largest podded of all the dwarf early Peas. It grows only 16 to 18 inches high, requires no support, and has the same large pods as Gradus, even a few days earlier in season and of little darker green color. The Peas are almost double the size of any other early dwarf Pea, are wrinkled, of bluish-green color, and have the true rich marrow flavor, tenderness and quality of the best main crop varieties. Its great earliness, the very large size and dark green color of the pods commends this variety particularly for market gardeners' use, while the unsurpassed quality makes it especially desirable for the table. Postpaid, pkt. 10c; ½ lb. 23c; lb. 42c.

THOMAS LAXTON

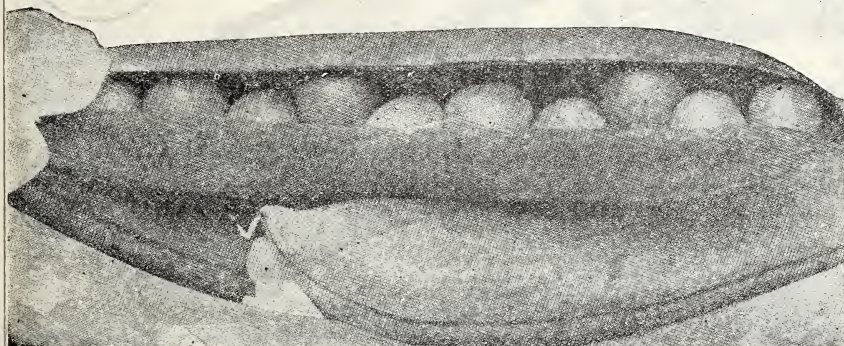

Extra Early Large Podded Sweet Wrinkled Pea.

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden. Postpaid, pkt. 10c; ½ lb. 21c; lb. 38c.

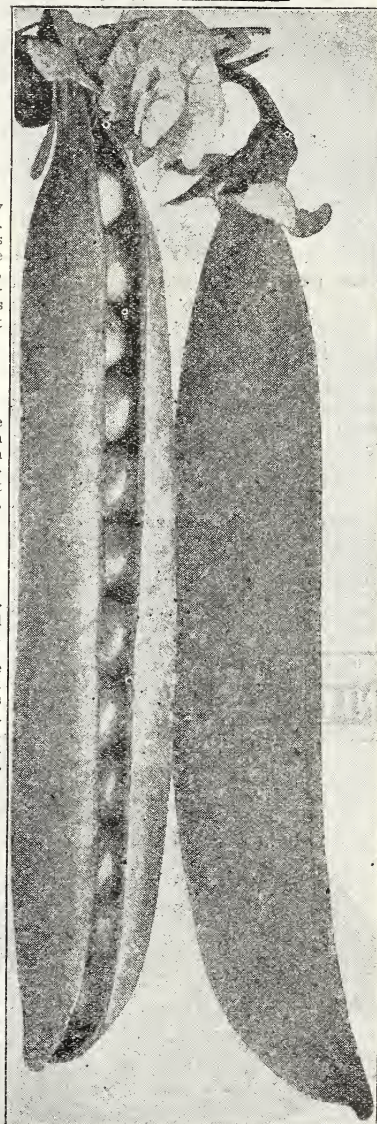

NEW EARLY GRADUS OR PROSPERITY

The Earliest, Largest Podded Wrinkled Pea.

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Earlies, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3½ feet high, requiring no sticks or brush, but sticks may be used if preferred. The vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4½ to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. These Peas retain their color and attractive appearance after cooking. Gradus is adapted to all purposes of the market gardener and does equally well in the home garden. Postpaid, pkt. 10c; ½ lb. 22c; lb. 40c.

Its two striking features are: The beautiful dark green color of the pods and its great keeping qualities, when ready for the table staying in excellent condition for a week longer than "Nott's" or "Wonders." Little Marvel is an extraordinary cropper, and although the pods are only of medium size, it is fully as productive as most larger podded kinds. BUCKBEE'S "FULL OF LIFE" PEAS

Second Early and Main Crop; Sweet, Wrinkled Sorts

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S NEW EVERBEARING

The Great Continuous Everbearing Variety.

Vine stout, about two and one-half feet high, bearing at the top six to ten broad pods. If these are picked as they mature and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The Peas are very large and wrinkled, cook very quickly, are tender, of superior flavor and preferred by many to any other sort. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 21c; lb. 38c.

IMPROVED CHAMPION OF ENGLAND

The Standard Sweet Flavored Late Wrinkled Pea.

Very productive and universally admitted to be one of the richest and best flavored Peas. Height four to five feet; seed light green and much shriveled. Very inferior and mixed stocks of this sort are frequently offered, but when the seed is as well grown and selected as that we offer, we consider the variety equal in quality to any in cultivation and one of the best of its season, either for the amateur or market gardener. This is the latest pea we grow; it is about a week later than Telephone. Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 20c; lb. 36c.

GRANT'S FAVORITE

The Ideal Home Garden Pea. Tall Vines, Large Pods; Luscious Peas Which Are Rich and Finely Flavored.

This fine variety of our own introduction is unquestionably the sweetest late Pea ever offered, coming into use just after the early varieties are through bearing. A luxuriant grower from 4 to 5 feet high. The pods are of good size, and always well filled with exceptionally sweet and highly flavored Peas. It is nearly an upright grower, but will do better if staked or planted along a fence. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 21c; lb. 38c.

IMPROVED STRATAGEM

High Grade Standard Dwarf Late Pea.

One of the best of the large-podded sorts. The pods are of immense size and uniformly filled with very large dark green Peas of the finest quality. The vines grow 18 to 20 inches in height. About 5 to 6 days later than the Daisy. It is vastly superior to the stocks now generally sold as Stratagem. Vines require no support. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 35c.

CARTER'S TALL TELEPHONE

Selected Stock

A Standard, Large Podded Main Crop Variety in Every Market.

The Telephone has become a favorite Pea with market gardeners whose trade appreciates fine appearance and high quality. Vines vigorous, growing about 4 feet high, producing an abundance of very large pods filled with immense Peas, which are tender, sweet and of excellent flavor. Foliage and pods are of light, bright green color. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 35c.

LAXTON'S NEW PROGRESS

Dwarf, Early, Large and Delicious. The Finest Pea Ever Grown.

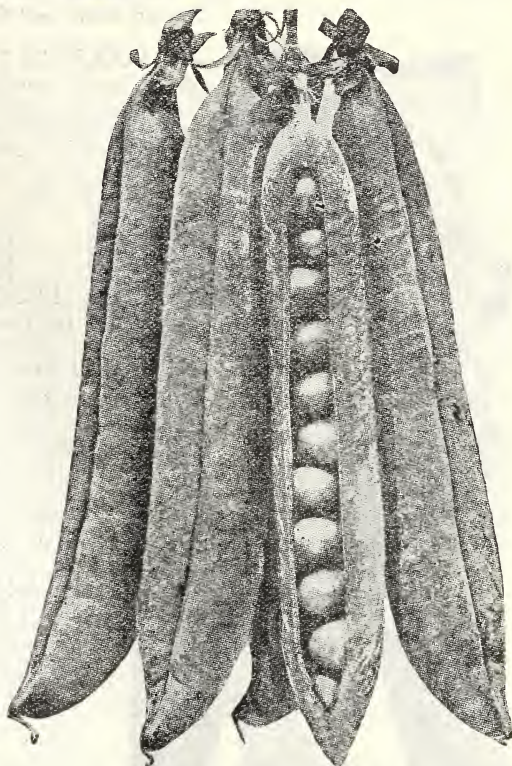

This new Pea is without question the very finest of the large podded, dwarf, early Peas. Of the same type as Giant Laxtonian, this Pea will mature several days earlier and produce a much heavier crop. Vines are dwarf, only 15 to 18 inches high, and the pods, which are rich dark green are $4\frac{1}{2}$ inches long and always crowded with large, dark green Peas of finest quality. We believe this is the earliest large podded dwarf Pea, and just what we have all been waiting for. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 28c; lb. 48c.

BUCKBEE'S NEW VIGOROSA

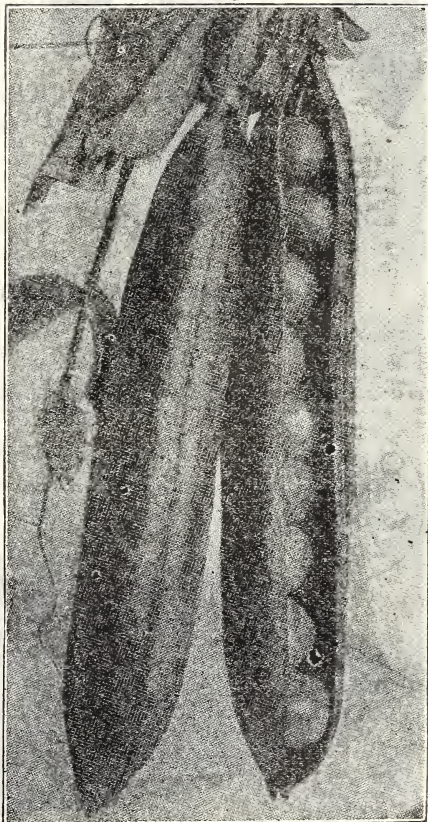

The Most Magnificent of All New Productions.

Nothing like it for a second early Pea has ever been produced. It requires no support. There is no Pea more prolific. It is a leader in the market and in demand among epicures. To try it is to surely succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled. No bushing at all is required. The vines grow to be but 20 inches tall and are so stout that they bear immense crops without falling. As an enormous yielder the New Vigorosa ranks first, and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 23c; lb. 42c.

Our Crimson Giant Globe Radish is one of our leading specialties, and many of our gardener friends who grow for market look forward for large quantities every season. See Page 3 of this book for prices in quantity. It is very early, notwithstanding its size. Color crimson, flesh pure white, of the best quality. The roots often weigh 1½ ounces each and are crisp and juicy. Fine for outdoors and forcing. The seed should be sown very thinly to permit full development of the roots. Pkt. 8c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

NEW GOLDEN HUBBARD

First Offered by Us as a Novelty. Now Known and Grown in Every State in the Union.

This is a true Hubbard Squash, except in color, which is bright golden. It ripens its crop very early and uniformly, thus making it a certain cropper. The fruits are very uniform in size, weighing from 6 to 8 pounds, and in shape are like the Hubbard. Though maturing early, they are wonderfully long keepers, so they can be held over in good condition for canning use. The shell is warty, hard and strong, and a very beautiful orange red color, except for a bit of olive green on the blossom end. The flesh is deep orange and uniformly so to the rind, never having the green tinge so objectionable in other sorts. It cooks very dry, fine grained and good flavored. Pkt. 6c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Our customers can plant this variety in perfect confidence that every fruit will be a pure Hubbard. Pkt. 8c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

This wonderful variety grows from 10 to 15 feet in height, and will begin to ripen by July 4th and bear until killed by frost. Flesh firm and solid, almost seedless and of the most delicious flavor. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25.

CHALK'S EARLY JEWEL

One of the largest, smoothest, best flavored second early bright red Tomatoes. Within a week to ten days as early as Spark's Earliana, it is even a heavier cropper, with Tomatoes of a larger size and sweeter flavor. Pkt. 8c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. \$1.65; lb. \$3.00.

BUCKBEE'S NEW 50-DAY TOMATO

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes.

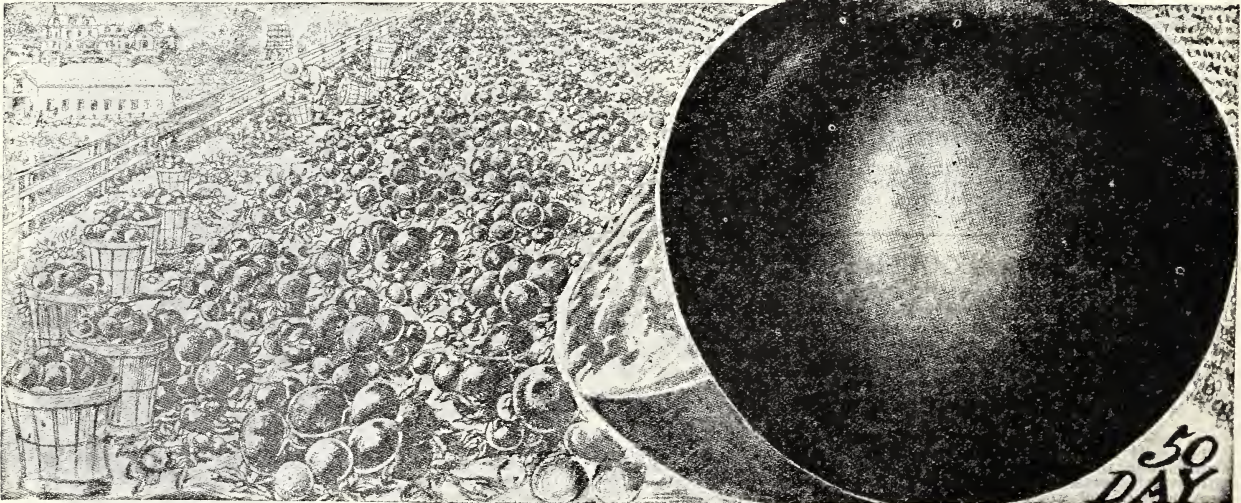

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and it should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Buckbee's Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.50; ½ lb. \$2.60; lb. \$4.75.

The
Giant

Tomatoes

BUCKBEE'S ABRAHAM LINCOLN
The World-Beating Tomato

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced by us in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each, or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—has superlative merit; it is a sturdy, healthy grower with distinctive bronzy-green foliage; it ripens its first fruits immediately following those of the early sorts and from that time until frost it is practically ever-bearing, yielding enormous quantities of tomatoes, no other variety approaching it in productiveness.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—on account of its solid character, splendid quality, rich red color of the flesh, and its appetizing appearance, is absolutely unsurpassed for slicing, salads and table use generally, while it is equally superior for baking, boiling and canning—the solidity of flesh and minimum of juice make thickening unnecessary.

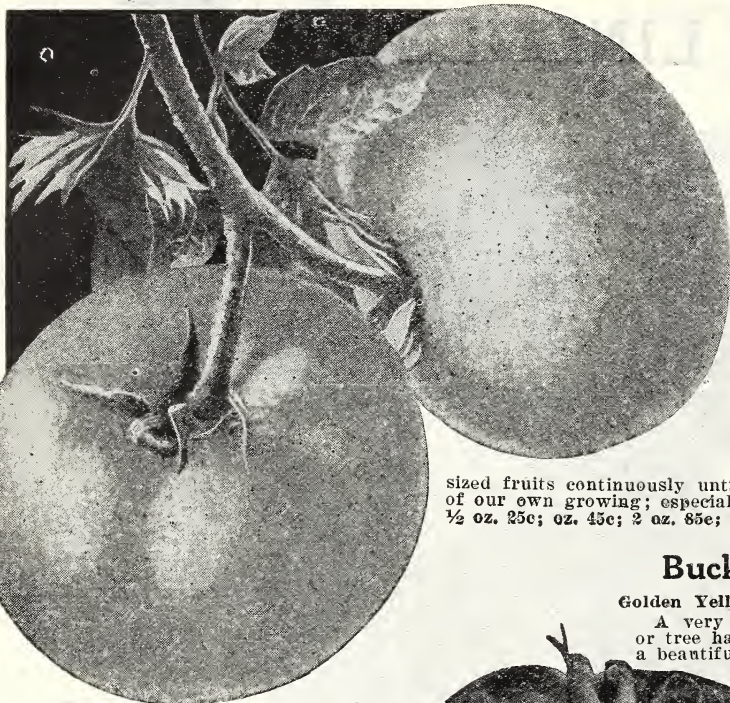

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—as a market variety, has already become very popular; its general merit and handsome appearance can not but attract buyers, and it is so solid that it "holds up" well when shipped, even though it does not have the thick, tough skin heretofore considered the most important requisite in a shipping tomato.

Seed of Buckbee's New Tomato Abraham Lincoln can only be obtained from the originator, H. W. Buckbee, Rockford Seed Farms. Buckbee's "Full of Life" Seeds are bred for disease resistant qualities. Pkt. of 200 seeds 20c; 3 pkts. 50c; ¼ oz. \$1.25; ½ oz. \$2.00; 1 oz. \$3.50. Postpaid.

Mrs. T. R. Lawton, Stuttgart, Ark.—I was more than pleased with my Abraham Lincoln Tomatoes.

Frank T. McCoy, Sunset Heights, Tex.—I had one of your Abraham Lincoln Tomatoes that weighed 1¼ pounds.

BUCKBEE'S "Full of Life" TREE TOMATOES

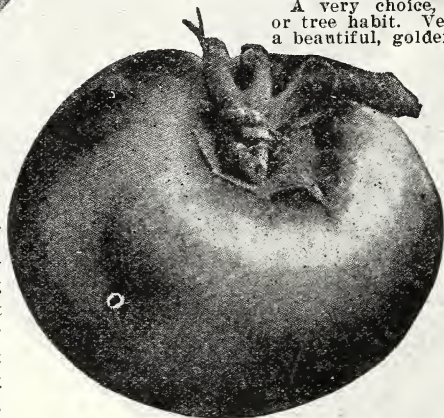

Buckbee's New Masterpiece.

Buckbee's Early Prosperity

Wonderful New Tomato of Great Value.

Prosperity is a Tomato of sterling worth, one that is bound to please. It is the earliest of the Tree Tomatoes, with large perfect fruits; a splendid keeper, an enormous yielder and fine shipper. Color bright scarlet red. Invaluable for the home garden, market garden or for shipping purposes. The vines are dwarf but vigorous and productive. Although an intermediate or rather late maturing variety, the fruits are of good color, being an attractive bright red, exceedingly smooth and very solid. It is a desirable sort for the home garden. We consider this the best dwarf large-fruited Tomato. Pkt. 8c; ½ oz. 25c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50.

Buckbee's Early Prosperity.

Buckbee's New Masterpiece

Vigorous Upright Growing or Tree Tomato—Wonderful, Firm and Solid—Beautiful Purplish Crimson Color—Rich Red Flesh

Buckbee's Tomatoes have been the Acknowledged Leaders for over 50 years and our varieties are planted by hundreds of thousands each year. In Buckbee's New Masterpiece we have the acme of perfection—not the largest grown but one of the best. In size it is just right for any purpose for which tomatoes are used, cooking, canning, shipping or slicing for the table. The tomatoes have thick solid flesh, there being no pulp or core, and thus cook without waste. The deep color is retained after cooking, making it especially desirable for canning. The skin is thin but strong, making an ideal shipper. Flesh is solid and of a beautiful dark red color. It has few seeds, making it a tomato that can be eaten entirely without waste. The habit of growth is exceptional in that it grows upright, throwing out branches from the main stalk and holds the fruit off the ground. Tomatoes grow mostly in clusters weighing from 10 to 20 ounces each. Strong and vigorous grower, bearing uniform sized fruits continuously until frost. Send to Buckbee's for choicest stock seed of our own growing; especially selected for disease resisting qualities. Pkt. 15c; ½ oz. 25c; oz. 45c; 2 oz. 85c; ¼ lb. \$1.65; ½ lb. \$3.00; 1 lb. \$5.50.

Buckbee's World's Fair

Golden Yellow Variety; Solid and Attractive.

A very choice, dwarf-growing yellow Tomato of upright or tree habit. Very early and a heavy yielder. The fruit is a beautiful, golden yellow color, of medium size, good shape, round and solid, and contains very few seeds. Flavor is delicious; very sweet and mild. A wonderful table variety and when sliced with red or purple sorts is very attractive. Pkt. 10c; ½ oz. 25c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50.

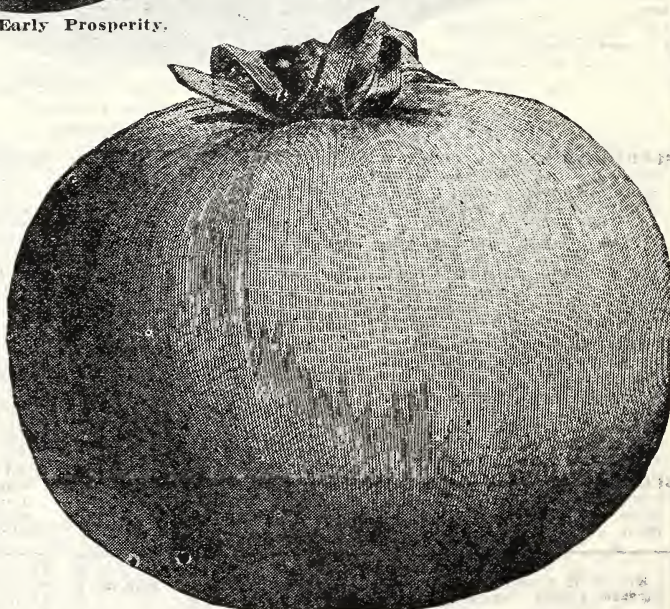

Buckbee's Dwarf Ponderosa

A true Dwarf Ponderosa. The fruits are glossy purplish-red, with solid, meaty, bright red flesh; no core and but few seeds. They are fully as large as those of the Tall Ponderosa. Plants grow about 2 feet high, stocky and branching, bearing Tomatoes in great clusters from July until frost. This enormous but erect growing variety is one of the most important advances made in Tomatoes, especially adapted to the home gardens. The original plant was discovered in a large field of Ponderosa. Pkt. 10c; ½ oz. 30c; oz. 50c; 2 oz. 95c; ¼ lb. \$1.75.

Buckbee's New Tree Tomato

Firm, Solid, Thick Flesh, Large Meaty Center.

This grand Tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches its maturity. In color the fruit is purplish pink, form always round and symmetrical and of medium size. Buckbee's New Tree Tomato is immensely productive, clusters of four to six fruits being produced in abundance along the stem. All of the fruits grow to a marketable size. The table qualities are the best as this is a good slicing variety, the seed cells being surrounded by rich, heavy flesh. This feature also makes it desirable for canning. As a shipper it stands up remarkably well, arriving at its destination in fully as good condition as when it left the field. This wonderful Tomato leaves nothing more to be desired, as it is mild, pleasant and of delicious flavor. Being a strong, robust grower it has a broad foliage which prevents sunburn in hot sections. Pkt. 10c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50; ½ lb. \$2.75; 1 lb. \$5.00.

Extremely Early, Smooth, Bright Red Tomato of Good Size and Flavor.

Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Send to Buckbee for the earliest train. Pkt. 8c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. \$1.65; lb. \$3.00.

BUCKBEE'S BONNY BEST

Plants Are Very Vigorous, of Robust Growth and Fruit Continuously Throughout the Season.

One of the very best early Tomatoes yet introduced; within a week as early as Earliana, but a much heavier cropper, producing Tomatoes of much larger size, more attractive in shape and color. The fruits are very smooth, round, very deep, solidly meaty, with only a few small seed cells; of bright deep scarlet color and of excellent quality. Very desirable for the home garden and one of the best for market. Gardeners whose trade demands extra fine fruits. As a canning sort it yields from 12 to 15 tons to the acre, grading as No. 1. Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.25.

New Earliana.

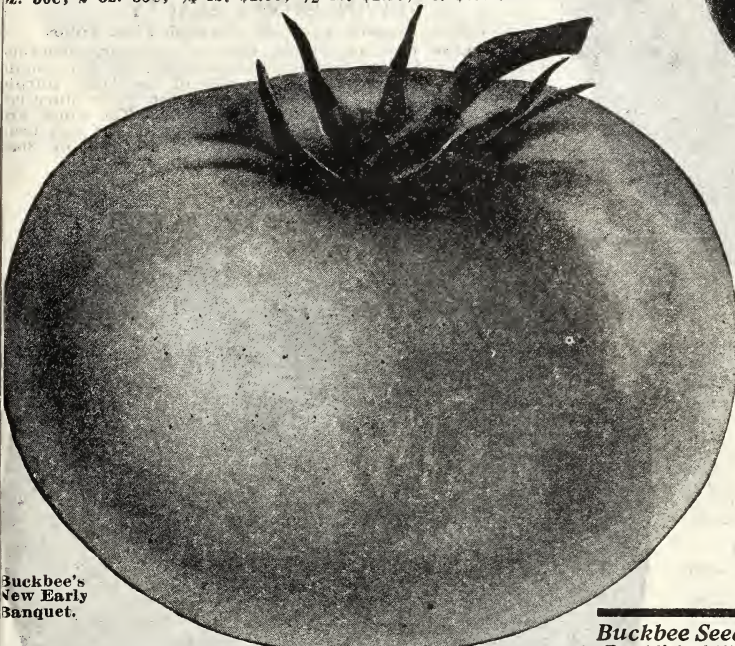

BUCKBEE'S NEW EARLY BANQUET

The Earliest and Finest Very Large Scarlet Tomato. The Most Valuable Early Variety Introduced in the Last 30 Years.

As large and more productive and earlier than Stone, the king of all main crop tomatoes for the canner and market gardener.

This new variety which we introduced in 1918 has all the good qualities of the old Stone, it has the same large solid, smooth fruits, and its immense productiveness but it far excels it in earliness, beginning to fruit about 2 weeks earlier, hence, lengthening the bearing season.

The fruits are brilliant, bright-red often weigh a pound and a pound and a half each and are borne in large clusters averaging six and more to the cluster; all fruits are invariably of marketable size and have flesh of the richest, brightest red color, which makes them especially suitable for canning and catsup making. Price, pkt. 10c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30; ½ lb. \$2.40; lb. \$4.25.

Buckbee's New Early Banquet.

NEW JOHN BAER—PEDIGREED STRAIN

Fruits Are Large, Smooth, Firm and Solid, and Nearly Round. Extra Early and Continues for a Long Time.

An extra early Tomato, large, smooth, bright scarlet fruits of excellent quality. Short, vigorous vines, enormously productive. Fruits larger, smoother, with less seeds than those of Earliana, but somewhat later. For early crops the New John Baer Tomato is planted exclusively in many sections supplying large city markets. Plants are compact in growth, with short, close-jointed branches, setting fruits very freely in the center. So freely are the fruits set that one plant usually will produce ½ to ¾ of a bushel of uniform Tomatoes in a season. Most valuable for the market gardener and very desirable for home use. Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.05; ½ lb. \$1.90; lb. \$3.50.

THE NEW STONE

Buckbee's Improved Strain, Large and Solid; Smooth and Uniform in Growth.

A standard main crop variety of red Tomatoes. Late, enormously productive with very large, very deep solid and very smooth fruits of splendid shape and finest quality. Unsurpassed for slicing and canning. The vines are large, vigorous and very productive. Buckbee's Improved Strain of this old and valuable variety is the finest on the market, being larger, smoother, more uniform in size and shape and of brighter color than that offered by others. Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities.

BUCKBEE'S NEW EARLY JUNE PINK

The Earliest Pink in Cultivation.

The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, good-sized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 40c 2 oz. 75c; ¼ lb. \$1.40; ½ lb. \$2.50; lb. \$4.50.

LIVINGSTON'S BEAUTY

Large, Smooth Fruit of Purplish-Pink Color.

We have been perfecting this to a larger, smoother fruit than the original stock, and think we have made it one of the smoothest and best of the large purple sorts. Fruit large, uniform, very smooth; color purplish pink, flesh light pink, excellent flavor. The vines are large, vigorous, not subject to rust or blight and bear enormous crops until killed by frost. Pkt. 8c; oz. 30c 2 oz. 55c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.25.

This is the largest of the yellow varieties in cultivation. The fruits are very uniform in shape and size, contain but little core and few seeds, and are a solid mass of succulent meat. Their skin is thin and they ripen the first fruit quite early, continuing to bear until frost. Pkt. 10c; ½ oz. 30c; oz. 55c; 2 oz. \$1.00; ¼ lb. \$1.85.

Strawberries from Seed

BRAZILIAN EVERBEARING

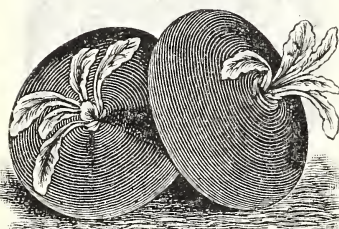

It will begin to bear fruit in about four months after seed is sown and continues to produce fruit until very late in the Fall. Seeds sown in April will give ripe berries in July. The berries are not as large as the standard varieties, but are of superior quality and have the rich wild Strawberry flavor. The plant is ever-bearing in the true sense of the word, producing fruit all Summer, and comes perfectly true from seed. It also makes a beautiful pot plant, will grow well in the house, and even fruit during the Winter. Perfectly hardy everywhere and easy to grow. A packet of seed should produce 40 to 50 plants. Pkt. 15c; 2 pkts. 25c.

Cow Horn

Sometimes called Long White. The roots are long, carrot-like, of cylindrical form but ending in a point and slightly crooked, they are 12 to 15 inches long by 2½ inches in diameter and grow partly above the ground. The color is pure white with a little shade of green on top. Well flavored and of rapid growth. Fine for Fall and early Winter use. Very valuable also as a soil enricher; can be sown broadcast in Fall on stubble ground, will grow on poor, wornout soils, and if plowed under will enrich it as much as a crop of clover. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

Buckbee's New Purple Top White Globe

Southern Seven Top

Cultivated extensively and with profit in the South for the tops, which are used and are most excellent for greens. It is very hardy, will grow all winter, but will not produce a good root. In many sections of the South it is also a favorite green feed for stock, and its use as a pasture crop like rape is quite general. Pkt. 6c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 65c.

THE BEST RUTA BAGAS

For feeding stock in fall and winter there is nothing superior to Turnips and Ruta Bagas. If sown the first of August Ruta Bagas make an excellent pasture for sheep during the fall months, and the root will furnish a rich food for them all winter. All kinds of stock relish them and fatten rapidly when Ruta Bagas are fed in combination with hay.

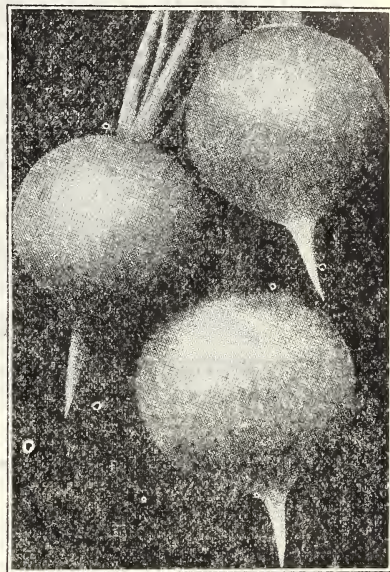

Buckbee's Giant

This is the finest of all Ruta Bagas, and a variety that should be sown in preference to all others. Prize Winner Everywhere. This magnificent Ruta Baga, which is more largely grown than any other, is the most profitable to grow of all Swede Turnips. It is the largest of all, growing to much greater size than the American Purple Top variety, which is so much used in this country; it out-yields all other sorts; a crop of a thousand bushels and over per acre under careful cultivation, being a frequent

occurrence; it is the most hardy of all Ruta Bagas, withstanding cold and drouth better than any other sorts. Bulbs are somewhat oval or slightly oblong in shape; purplish red above and bright yellow below the ground. They are quite smooth with but a small tap root and have a small top and very short neck and remain sound and good indefinitely. Flesh is of a beautiful yellow color, always sweet, tender, juicy and nutritious. Prices: Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.00.

It is easily the greatest garden fruit ever introduced. Easiest plant in the world to grow. Buckbee's Beautiful Asters

BUCKBEE'S CALIFORNIA GIANTS ASTER

Enormous Flowers on Long Strong Stems. Beautifully Curled Petals Completely Covering the Center of the Flower. Colors Bright and Varied.

California Giants is our newest Aster, and one of the finest. The most important feature of this new race of Asters is that the plants are non-lateral—that is, the flower is always borne on the end of a long strong stem without the objectional buds and small flowers on the same stem. Every flower is perfect and complete in itself. The individual petals are wide and curled so that each blossom is a solid ball of tightly folded and curled petals which completely hide the yellow centers so common with some varieties. The type is well fixed and all flowers will come true. We offer Mixed Colors only, but in our mixture will be found about six different colors ranging from purple to clear white. When you see the California Giants Asters in full bloom you will surely agree that you have never seen their equal. Pkt. 12c; ¼ oz. 50c.

RED FEATHER ASTER

This is a wonderful new Aster. Nothing like it ever seen before. Has excited attention wherever shown, and cannot help pleasing all who grow it. The wide outspreading petals measure nearly seven inches across on a long straight stem. Several petals cross and re-cross covering its center, and the brilliant red color will take anyone's eye. Plants are dwarf and branching and often produce 14 to 20 flowers to a plant. Pkt. 15c.

THE KING ASTER

A magnificent American Aster distinct from all other varieties. Strong, sturdy plants, 18 inches high, bearing on long stems massive, double flowers 5 inches across, the petals of which are long, narrow and folded lengthwise, which gives them the appearance of being quilled. The flowers are of great substance and last longer than any other Aster. They bloom from August to October.

Very Unusual in Form But as Easily Grown as Any.

Double Phlox are most desirable annuals for cut flowers, lasting longer than single ones. We have secured a particularly fine strain from France, which has a large percentage of pure white and cream color and is perfectly double and semi-double. The white is especially valuable as a cut flower. The semi-double flowers are fully as desirable as the doubles; in fact, many claim they are even prettier. This Phlox is not rivaled among garden flowers in brilliancy of bloom. They are strong growing, healthy plants, with pretty foliage, and belong in every garden, being one of the most brilliant and at the same time one of the earliest and most satisfactory plants which can be readily grown from seed. The fine blooms, produced in large trusses, furnish a grand display in the garden and are very effective for table decoration. We are sure our customers will be greatly pleased with them. The Aristocrats of the Aster Family

When we first offered the American Beauty in 1918 we had an immense flower of a most pleasing color. This has been perfected so that now we have a flower 4 to 5 inches in diameter. In 1920 we listed for the first time New Purple American Beauty and later the New Lavender and September Pink—three varieties that are now in even greater demand than the original Carmine American Beauty. All four colors come true from seed and are of the same mammoth size as the original. We grow these wonderful Asters on our own farm and select the seed from the finest flowers only.

BUCKBEE'S NEW DOUBLE FLOWERING SWEET PEAS

In Fine Mixture.

The so-called Double Sweet Peas are not a double flower in the true sense. Instead of one standard they have two or three, giving ruffled and fluted effects. Very showy and beautiful. Under favorable conditions they will produce a large percentage of double flowers. Usually the double and single flowers are borne about half-and-half. They are regular tall-growing Sweet Peas. One mixture includes every desirable shade and color. Pkt. 10c; oz. 25c; 2 oz. 35c; ¼ lb. 60c.

MARY PICKFORD SWEET PEAS

WONDROUS WEATHER PLANT

This beautiful plant has, during the last few years, created a great sensation. If the leaves stand upright, the sky will be cloudless; if they stand out straight, changeable weather is indicated; when the leaves hang straight downward, water may be expected to fall in torrents. A local storm is indicated by the curling together of the leaves. Bears clusters of bright yellow flowers, followed by pods with brilliant red seeds used for making beads, etc. Seeds should be soaked in lukewarm water before planting. Pkt. 10c; ¼ oz. 35c.

NEW PICOTEE ZINNIA—A remarkable and beautiful new type of Zinnia developed in California. The flowers are always of the largest size, measuring 4 to 6 inches in diameter. BUCKBEE'S RAINBOW FLOWERS OR HARDY IRIS

The Most Wonderful Colorings of Any Plant Grown Except the Orchid

These Iris are all sun lovers and delight in a sunny situation. They are all deliciously fragrant, large and handsome, more or less beautifully mottled and veined. Their beauty at first sight rivals that of the Orchid, but, on closer examination, have no hesitation in saying they yield points of interest not to be found in the whole of the Orchid family. Those who have not used these Iris for surrounding lakes and ponds, or cultivated them in the flower borders, shrubberies, woodland walks, and wild gardens should do so. If planted around ponds or lakes they should be placed well above the water level.

BEETHOVEN—This is a fine waxy white, and nearly the same color throughout. The flowers are borne with large clusters on a stem and many flower stalks to each plant. 25c each; 3 for 71c, postpaid.

DAPHNE—The upright petals or standards are slate blue, an unusual color in this flower. Falls are lavender, beautifully mottled with purple. 25c each; 3 for 71c, postpaid.

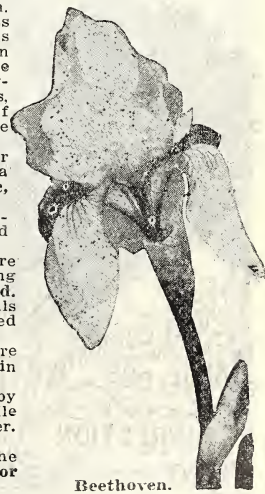

DOROTHEA—One of the most beautiful of its class. The flowers are a pure white with a broad and irregular border of clear blue, and are borne on strong stems which are often more than 2 feet in height. 25c each; 3 for 71c, postpaid.

ELDORADO—An extremely large flower for an Iris. Standards or upright petals are a fine creamy yellow. The falls are purple on yellow, blotched and striped with a margin of cream. 25c each; 3 for 71c, postpaid.

IVANHOE—A combination of colors which is hard to beat. The uprights are primrose yellow, while the falls are lilac and primrose. Many petals come in lemon yellow with purple edge. 25c each; 3 for 71c, postpaid.

RED CLOUD—This is the very darkest colored of all the Iris, and claimed by many to be the finest. The upright or standing petals are purplish lilac, while the drooping petals are deep velvet black, making a very striking flower. 25c each; 3 for 71c, postpaid.

EXCELSIOR MIXED ALL COLORS—A splendid assortment of over 20 of the best varieties. Many are so scarce that we cannot list them separately. 3 for 70c; 6 for \$1.30; 12 for \$3.50, postpaid.

The individual fronds or leaves grow from 6 to 8 inches in width, and when cut and put in water, retain their shape and color for weeks.

The bright green foliage of very delicate texture falls gracefully, giving it a style and air that cannot be surpassed. No finer decorative plant has ever been introduced. As a house plant it is deservedly popular as it will thrive under almost all conditions.

The blossoms are of large size, intense royal velvety-purple when in full bloom, varying through all the exquisite shades of violet; 6 inches across, richly veined and handsomely shaded. Every year's growth adds to its beauty. It is a perpetual bloomer. Fine 2-year-old field grown roots, 90c each, postpaid.

Buckbee's White Beauty

A Beautiful Climber Covered All Fall With Innumerable Small White Flowers.

Without question this is one of the most beautiful of our hard flowering Vines. The flowers are pure white, three-fourths of an inch in diameter, star-shaped, and are borne in great panicle or clusters of bloom, fairly covering the plant. These clusters are carried on long, slender stems, and stand out boldly from between the glossy-green leaves. The fragrance of the flowers is delicious, resembling the English Hawthorn blossoms. It begins to bloom in August, at a time when most other hardy climbers are out of bloom—an inestimable advantage. It is a strong, rapid grower, quickly reaching a height of from 15 to 20 feet, and spreading out when trained to wires or strings. It is perfectly hardy in all sections of the country, and it is, in our opinion, the most valuable among hardy climbing vines. A grand porch climber. Strong roots, 45c each; 3 for \$1.25. Larger roots, 65c each; 3 for \$1.85, postpaid.

Paniculata—Sweet Scented

Fragrant and Beautiful—Rapid Grower—Charming Small White Flowers.

Of rapid growth, quickly covering trellises and arbors with handsome, clean glossy green foliage. Flowers of medium size, pure white, borne in immense sheets; of a most delicious and penetrating fragrance. Strong roots, 35c each; 3 for 95c, postpaid.

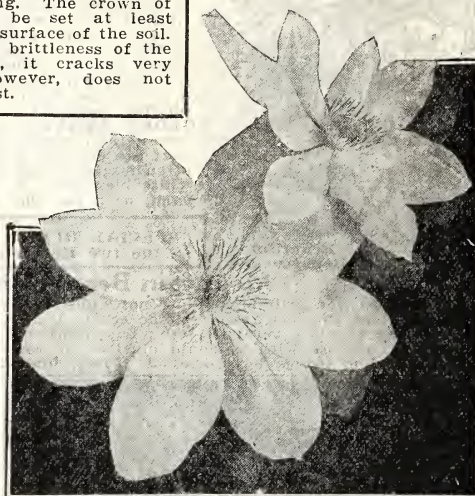

Henryii—The Large Flowered White

Very Unusual—As Large as the Largest, and Pure White.

The newest and one of the best of all the Clematis. We have always had large flowered varieties, but not in Whites. The vine is a strong grower, and is covered throughout the season with fine, large, creamy white flowers. The very best of the white varieties; a perpetual bloomer. Fine 2-year-old field grown roots, 95c each, postpaid.

REGARDING CLEMATIS

The Clematis we offer this season are exceptionally fine, strong 2-year-old plants. Many failures in the growing of Clematis are the result of too shallow planting. The crown of the roots should be set at least 3 inches below the surface of the soil. On account of the brittleness of the bark on Clematis, it cracks very easily, which, however, does not harm it in the least.

Clematis—Henryii.

Start Right! Get the Best. **ORDER EARLY.**

NOTICE—All varieties marked (S) are Staminate Perfect Flowering and Bi-Sexual varieties. All varieties marked (P) are Pistillate and destitute of Stamens. Therefore when planting varieties marked (P) it will be necessary to have every third row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.

For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

MONEY IN STRAWBERRIES

A Strawberry Bed is a safe and sure investment. Greatest of all Money Makers. \$600.00 profit per acre. Only one expense—the cost of plants, which is merely nominal—lasts for years.

EVERBEARING OR FALL-BEARING STRAWBERRY

A dish of luscious strawberries in the fall is a luxury which everyone who owns a garden could enjoy. Plant at least twenty-five plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in the spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the fall crop.

WE WARRANT all shipments of Strawberry Plants to reach purchaser's hands in good growing condition and when so accepted no orders will be duplicated or replaced for any cause.

No class of plants will yield better or more pleasing results for the money invested. They require very little care or attention, are perfectly hardy and yield a rich harvest of bloom.

Buckbee's Combination Lawn and Garden Invigorator

The Wonder Fertilizer—The Marvelous Lawn Tonic—The Unequalled Garden Medicine.

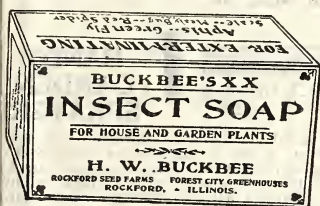

Made in Rockford—This Is Not an Experiment But Has Been Used for Years with Excellent Results.

Extensive experiments have convinced us that this unequalled Fertilizer or Garden Invigorator is the most wonderful product of its kind ever offered. This last season we have given it final and exhaustive tests, which have proven beyond a doubt that it should be used in every State in the Union. No matter for what purpose, or under what conditions it was used, the results were always the same—simply marvelous.

A Petunia Bed, with our combination Invigorator sprinkled lightly on the soil, showed an increase in size of the flower, and more brilliant colorings. Vegetables planted in poor soil in July when others were well started towards bearing, not only made heavier yields, but matured almost as soon as the earlier planted garden. Lawns with an application of 25 pounds to 1000 square feet grew heavier sod of a richer color, and were still as green on December 1st as in the Summer time. Keep a bag on hand always. You will need it almost the year around. For sale only by H. W. BUCKBEE so send to us for BUCKBEE'S COMBINATION LAWN AND GARDEN INVIGORATOR. Packed in 3 size bags to meet all requirements. Shipped by Express or Freight at buyer's expense. 25 lbs. \$1.65; 50 lbs. \$2.60; 100 lbs. \$4.25.

Successful Hand Cultivators

Well-Designed Grass Hooks

Three Convenient Sizes

No. N55. Cultivator. Has 5 prongs and is the most popular size, as it meets all the requirements of the larger garden. Thoroughly loosens soil and destroys all weeds. It works on the same principle as the large field cultivator, and the soil is cultivated to a depth of approximately 3-inches. Center prong may be quickly detached for straddling a row. Four-foot ash handle. By express.....\$1.15

No. N33. Cultivator. This is a modification of the No. 55. While it is made on the same principle and has the same length handle, it is smaller in size and weight, with three prongs instead of five. Because it is particularly adapted to small gardens it is rapidly gaining in favor—especially as a cultivator for women's use. You really pay no more for this modern cultivator than for a good grade of old-fashioned, laborious hoe, which is another reason for its popularity. By express.....85c

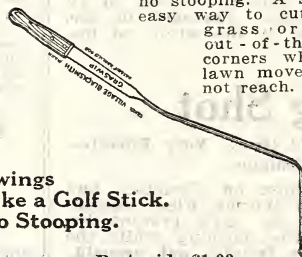

No. N11. Midget Weeder. Similar in construction, quality and finish to the No. 33 Cultivator. It is smaller, however, and has a 9-inch handle. Specially designed for cultivating flowers, small shrubbery, etc., where careful hand work is necessary. Due to their special construction any part of these three cultivators may be renewed at any time so that they may be depended upon for years of service. By express.....50c

Has patented offset, and swings perfectly in the hand with little muscular effort. Forged from cutlery steel and ground sharp. Oil finish maple handle. Postpaid 65c.

LiMite Rids Chicken Houses of Mites

EASY TO INSTALL. JUST TACK ON ROOSTS.
Suppose you were in a dark dungeon infested with thousands of hungry rats. Think of it! Mr. Poultryman, that is exactly the position of your faithful hens. Every night brutally assaulted by a host of insidious assassins. Millions of vicious mites crawling over their bodies, sucking their precious blood. Hen's can't lay if they are infested with lice and mites.

BROWER'S LiMite Tape Guaranteed—Money Back if it Fails

It is a real common sense method. It comes in tape form and is tacked to the roosts. Chickens standing right over LiMite Tape are bathed in the fumes which arise and penetrate every feather. These fumes are absolutely harmless to hens or animals, but lice and mites have no lungs—they have to breathe through the pores of the body. Order Brower's LiMite today. It's guaranteed. Money back if it fails.

Make This Test—Put white paper under roosts. In morning examine paper for Dead Mites.

Chicken Mites Blood filled.

Mulch Paper Produces Earlier and Bigger Crops for Garden and Farm

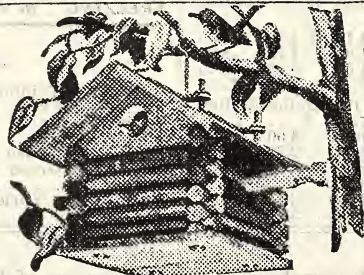

The Arlington Experimental Farm of the U. S. Department of Agriculture has tested mulch paper for 5 years. It has been shown that by laying strips of this paper along the rows and planting through holes in the paper you increase size of plants and yield, harvest crops from one to two weeks earlier, and eliminate all the back-breaking labor of cultivating and weeding. This is because the black paper catches and holds the sun's heat, prevents moisture leaving soil, and stops growth of weeds around plants. Only the plants, growing through holes in paper, can thrive.
